Slow Death by Rubber Duck - Rick Smith 2009-12-10

A look at the chemicals surrounding us that's "hard-hitting . . . yet also instills hope for a future in which consumers make safer, more informed choices" (The Washington Post). Pollution is no longer just about belching smokestacks and ugly sewer pipes—now, it's personal. The most dangerous pollution, it turns out, comes from commonplace items in our homes and workplaces. To prove this point, for one week Rick Smith and Bruce Lourie ingested and inhaled a host of things that surround all of us. Using their own bodies as the reference point to tell the story of pollution in our modern world, they expose the corporate giants who manufacture the toxins, the government officials who let it happen, and the effects on people and families across the globe. This book—the testimony of their experience—also exposes the extent to which we are poisoned every day of our lives, from the simple household dust that is polluting our blood to the toxins in our urine that are created by run-of-the-mill shampoos and toothpaste. Ultimately hopeful, the book empowers readers with some simple ideas for protecting themselves and their families, and changing things for the better. "Undertaking a cheeky experiment in self-contamination, professional Canadian environmentalists Smith

and Lourie expose themselves to hazardous everyday substances, then measure the consequences . . . Throughout, the duo weave scientific data and recent political history into an amusing but unnerving narrative, refusing to sugarcoat any of the data while maintaining a welcome sense of humor." —Publishers Weekly (starred review)

Fiction's Overcoat - Edith W. Clowes 2018-07-05

If Dostoevsky claimed that all Russian writers of his day "came out from Gogol's 'Overcoat,'" then Edith W. Clowes boldly expands his dramatic image to describe the emergence of Russian philosophy out from under the "overcoat" of Russian literature. In *Fiction's Overcoat*, Clowes

responds to the view, commonly held by Western European and North American thinkers, that Russian culture has no philosophical tradition. If that is true, she asks, why do readers everywhere turn to the classics of Russian literature, at least in part because Russian writers so famously engage universal questions, because they are so "philosophical"? Her answer to this question is a lively and comprehensive volume that details the origins, submergence, and re-emergence of a rich and vital Russian philosophical tradition. During the late nineteenth and early twentieth centuries, Russian philosophy emerged in conversation with narrative fiction, radical journalism, and speculative theology, developing a distinct cultural discourse with its own claim to authority and truth. Leading Russian thinkers—Berdiaev, Losev, Rozanov, Shestov, and Solovyov—made philosophy the primary forum in which Russians debated metaphysical, aesthetic, and ethical questions as well as issues of individual and national identity. That debate was tragically truncated by the events of 1917 and the rise of the Soviet empire. Today, after seventy years of enforced silence, this particularly Russian philosophical culture has resurfaced. *Fiction's Overcoat* serves as a welcome guide to its complexities and nuances. Historians and cultural critics will find in Clowes's book the story of the increasing refinement and diversification of Russian cultural discourse, philosophers will find an alternative to the Western philosophical tradition, and students of literature will enjoy the opportunity to rethink the great Russian novelists—particularly Dostoevsky, Pasternak, and Platonov—as important voices in the process of shaping and sustaining a new philosophy and ensuring its survival into our own age.

Transactions at Play - Cindy Dell Clark

2009-05-16

When players play, there is a transactional process at work, whether for children on a teeter-totter or pandas playing with peers. In this edited volume, nine experts on play show how play transactions are an important dynamic of play across cultures, age groups, even species. A rich array of play contexts is evident across the nine chapters, encompassing varied continents, age groups, and sorts of players. The play processes of giant pandas, of home-visiting therapists, of Polynesian women, and of autistic kids are included here. The healthy interchange of ideas about play, one of the hallmarks of the Association for the Study of Play, is a process that is cultivated in this new volume.

Yes, Granddaughter, YOU CAN - Joyce M.

Wrenn 2017-03-29

Yes, Granddaughter, YOU CAN by Joyce M. Wrenn
Joyce M. Wrenn's *Yes, Granddaughter, YOU CAN* is the inspiring memoir of a woman whose career should be a source of encouragement for our youth, young women and young men alike. She succeeded in breaking through the "glass ceiling" before others even knew there was a crack. The definition of "glass ceiling" is: "The unseen, yet unbreachable barrier that keeps minorities and women from rising to the upper rungs of the corporate ladder, regardless of their qualifications or achievements." This term first surfaced in the mid-1980s. With immigrant grandparents, Wrenn's father stressed the importance of education. In college, she chose studies like math and physics over the "liberal arts" many girls studied. Even though she married young, she continued her education and graduated, accepting her first job as a computer programmer for Bendix in 1959. Over the years, Wrenn's career progressed as she moved back and forth across the country, working for such companies as IBM, Bank of America, American Airlines, Union Pacific RR—each move a step up the ladder—retiring as CIO in 1999. Wrenn hopes her story will help young people, especially women, in their quest to climb the corporate ladder in their own careers.
