Philosophy and Catholic Theology - Philip A. Egan 2017-06-15

This short book offers a survey of recent philosophy and how its different patterns of thought have influenced Catholic theologians. Rooted in the questions raised by Vatican I and the directions pointed by Vatican II, Philosophy and Catholic Theology shows how theology has developed over the past two centuries and how it builds on the foundations philosophy has laid since the Middle Ages and the crises of the Reformation and the Enlightenment. The issue of the relationship between faith

and reason, so acutely raised in those periods, cannot be addressed without some understanding of the sciences that examine those two fields: reason is the province of philosophy, and faith is the realm of theology. Once we have a grasp of philosophy and its questions, we are in a better position to understand theology. When we have a clear picture of both, we can see how theology has built on and been influenced by philosophy. And at that point we can begin to see how reason informs faith and how the two work together to yield knowledge of life's most profound realities. Philip A. Egan is a priest of the Diocese of Shrewsbury, England. He completed his doctoral studies at the University of Birmingham and specializes in the thought of John Henry Cardinal Newman and Bernard Lonergan, SJ. Until recently, he was the dean of studies and professor of foundational theology at St. Mary's College, Oscott.

Restoring Faith in Reason - Laurence Paul Hemming 2003
CONTAINING THE COMPLETE LATIN text alongside a new English translation of *Fides et ratio*, this book is the first in a series of studies which address, from a variety of different perspectives, the questions raised by this encyclical. This work is inspired by the assurance of John Paul II that by insisting on the truth of faith, we can both restore to contemporary men and women a true confidence in their capacity for reflecting and can also inspire philosophers to regain and

develop the proper dignity of their discipline. Contributors to this volume provide commentary and analysis which substantially advance debate about Fides et ratio. This series, co-published with SCM Press, is informed by a desire for the mutual engagement of the disciplines of theology and philosophy on issues of faith and reason. Volumes in this series constitute an ecumenical renewal of the work of philosophical theology, both as an illumination of the foundations of faith, and as an apologetic for faith that may be heard by those in search of truth.

Dialogues between Faith and Reason - John H. Smith 2011-10-15

The contemporary theologian Hans Küng has asked if the "death of God," proclaimed by Nietzsche as the event of modernity, was inevitable. Did the empowering of new forms of rationality in Western culture beginning around 1500 lead necessarily to the reduction or privatization of faith? In *Dialogues between Faith and Reason*, John H. Smith traces a major line in the history of theology and the philosophy of religion down the "slippery slope" of secularization—from Luther and Erasmus, through Idealism, to Nietzsche, Heidegger, and contemporary theory such as that of Derrida, Habermas, Vattimo, and Asad. At the same time, Smith points to the persistence of a tradition

that grew out of the Reformation and continues in the mostly Protestant philosophical reflection on whether and how faith can be justified by reason. In this accessible and vigorously argued book, Smith posits that faith and reason have long been locked in mutual engagement in which they productively challenge each other as partners in an ongoing "dialogue." Smith is struck by the fact that although in the secularized West the death of God is said to be fundamental to the modern condition, our current post-modernity is often characterized as a "postsecular" time. For Smith, this means not only that we are experiencing a broad-based "return of religion" but also, and more important for his argument, that we are now able to recognize the role of religion within the history of modernity. Emphasizing that, thanks to the logos located "in the beginning," the death of God is part of the inner logic of the Christian tradition, he argues that this same strand of

reasoning also ensures that God will always "return" (often in new forms). In Smith's view, rational reflection on God has both undermined and justified faith, while faith has rejected and relied on rational argument. Neither a defense of atheism nor a call to belief, his book explores the long history of their interaction in modern religious and philosophical thought.

[Atheist Delusions](#) - David Bentley Hart 2009-04-21
Religious scholar Hart argues that contemporary antireligious polemics are based not only upon conceptual confusions but upon facile simplifications of history and provides a powerful antidote to the New Atheists' misrepresentations of the Christian past.

The Mind of Pope Francis - Massimo Borghesi 2018-08-15
A commonly held impression is that Pope Francis is a compassionate shepherd and determined leader but that he lacks the intellectual depth of his recent predecessors. Massimo Borghesi's *The Mind of Pope Francis*: Jorge Mario

Bergoglio's Intellectual Journey dismantles that image. Borghesi recounts and analyzes, for the first time, Bergoglio's intellectual formation, exploring the philosophical, theological, and spiritual principles that support the profound vision at the heart of this pope's teaching and ministry. Central to that vision is the church as a coincidentia oppositorum, holding together what might seem to be opposing and irreconcilable realities. Among his guiding lights have been the Jesuit saints, Ignatius and Peter Faber; philosophers Gaston Fessard, Romano Guardini, and Alberto Methol Ferrer; and theologians Henri de Lubac and Hans Urs von Balthasar. Recognizing how these various strands have come together to shape the mind and heart of Jorge Mario Bergoglio offers essential insights into who he is and the way he is leading the church. Notably, this groundbreaking book is informed by four interviews provided to the author, via audio recordings, by the pope

himself on his own intellectual formation, major portions of which are published here for the first time.

*Thomistic Common Sense: The
Philosophy of Being and the
Development of Doctrine* - Fr.
Reginald Garrigou-Lagrange
2021-06-24

Despite living in an
“information age,” we are
confronted by the clash of
ideologies and a crisis of
universal knowledge. The
Church is not unaffected by the
world’s weariness and similarly
faces what Fr. Mauro Gagliardi
describes as “the lack of truth,
or perhaps better, the
disinterest in it.” Today’s
philosophical and doctrinal
decline are the results of the
loss of first principles and a
relativistic view of doctrinal
development. As Matthew
Levering writes in the
Foreword, this first-time
English translation of Fr.
Réginald Garrigou-Lagrange’s
*Le sens commun: La
philosophie de l’être et les
formules dogmatiques* by the
acclaimed translator Matthew
Minerd “arrives at an

auspicious time." This book sees the great Dominican master address a variety of fundamental topics that we need to return to and relearn in our day: the relationship between common sense and both philosophy and faith; the proper defense for philosophical realism; the subordination and coordination of philosophical first principles; our natural capacity for knowing God's existence; and, at length, the problem of dogmatic development. Although originally written during the Catholic Modernist crisis at the turn of the twentieth century, Thomistic Common Sense is no mere relic of past controversies. Jacques Maritain, for example, while reflecting on his formation as a Thomist, cited it as particularly influential. In our own time, this book serves as a foundational textbook of Thomistic philosophy, communicating its wisdom with clarity, power, and perennial resonance.

The Teachings of Pope John Paul II - John E. Fagan 2005

Fides Et Ratio - John Paul II
2000-11-01

This encyclical, promulgated by Pope John Paul II on

September 14, 1998, deals primarily with the relationship between faith and reason.

Faith needs reason, for without reason, it leads to superstition. Reason without faith leads to nihilism and relativism. The key to the document is the

appeal that faith and philosophy recover that profound unity which allows them to stand in harmony without compromising their mutual autonomy.

Lumen Fidei - Pope Francis
2013

Pope Francis offers a profound and compelling reflection on humanity's need for faith in his first encyclical, *Lumen Fidei*, which completes the work of his predecessor, Pope Benedict XVI. Without the light of faith, he writes, "all other lights begin to dim." Speaking of those today who view faith as a kind of darkness or only to be sought when reason fails, the Holy Father says faith "sees things as Jesus himself sees them." Far from divorcing us from reality, our faith in Jesus "enables us to grasp reality's deepest meaning and to see how much God loves this world." Book jacket.

Bound to Be Free - Reinhard Hutter 2004-07-20

"Bound to Be Free" explores the scriptural concepts of church ("ekklesia"), freedom ("eleutheria"), and truthful

speech ("parrhesia"), showing not only that the proper meanings of three concepts interpenetrate one another but also that rending them asunder lies at the root of Christian division today. According to Reinhard Hutter, the crucial interrelationship of these three concepts has long been obscured by ongoing church division. Separated from each other, many Christians assume that freedom can be maintained and truthful speech preserved only at the cost of unity. Others assume that Christian unity can be attained only if freedom and truthful speech are narrowly circumscribed in their proper exercise. Christian division issues from the all too familiar individualistic accounts of church, freedom, and speech that have haunted modernity and clouded the proclamation of the gospel. This book shows that here, at the beginning of the twenty-first century, it is imperative that Christians attend to this crucial interrelationship and its source in the God of the gospel. Hutter

discusses the meaning, role, and importance of each concept in turn, engaging along the way a wide range of classical and contemporary voices in theology, philosophy, and culture that reveal in different ways how church, freedom, and truthful speech support one another. "Bound to Be Free" is a groundbreaking work that challenges common approaches to ecumenism and points a fruitful new course ahead.

Faith and Reason Today -

Varghese J. Manimala 2008

[Catholic Engagement with](#)

World Religions - Karl Josef Becker 2010
Twenty-Five Element International Scholars show how roman catholic theology has grappled with religious pluralism. Catholic Engagement with World Religions outlines, clarifies, and defends official Roman Catholic teaching on the relationship between Christianity and other religious traditions in light of the Catholic belief that "We must hold that the Holy Spirit offers to all the possibility of being made partners, in a way known to God, in the paschal mystery".(Gaudium et Spes, 22)
Part I studies the history of these issues while Part II examines their theological framing. Part III addresses Christianity and other religions since Vatican U. Part IV deals specifically with Judaism, Confucianism, Hinduism and Islam as these religions see themselves in relation to Christianity. A final chapter by Bishop Michael Fitzgerald offers a theological reflection on the foundations of

interreligious dialogue today. For scholars, students, and practitioners of interreligious encounter, Catholic Engagement with World Religions is necessary and absorbing reading. Karl J. Becker, S.J., and Ilaria Morali teach at the Gregorian University in Rome.

The Sense of Mystery: Clarity and Obscurity in the

Intellectual Life - Fr.

Reginald Garrigou-Lagrange,
O.P. 2018-05-01

The Sense of Mystery highlights what is clear and what retains the character of mystery in the traditional and Thomistic solution concerning the great problems pertaining to our knowledge in general, to our knowledge of God (whether naturally or supernaturally attained), and to questions pertaining to grace. St. Thomas has fear neither for logic nor for mystery. Indeed, logical lucidity leads him to see in nature those mysteries that

speak in their own particular ways of the Creator. Likewise, this same lucidity aids him in putting into strong relief other secrets of a far superior order—those of grace and of the intimate life of God, which would remain unknown were it not for Divine Revelation.
