[Accounting and Finance for Managers](#) - Matt Bamber 2014-04-03

Accounting and Finance for Managers is specifically designed for the needs of MBA, EMBA and MA Business and Management students. It includes worked examples throughout the chapters, as well as real-world

scenarios and full exercises at the end of each chapter. The book also includes 'Expert view' notes, which encourage students to think more broadly and present them with further issues to consider. For lecturers, the book begins with an indication of how the course material throughout the book might be divided over different time periods. Providing coverage of basic bookkeeping, readers will learn how to interpret financial statements and grasp underlying theory, interpret a cash budget and identify potential problems, identify appropriate pricing strategies to fit different markets and products/services and incorporate financial evaluation into operational decision making and problem solving. Online supporting resources for this book include bonus chapters covering topics such as cash flow, investment decisions and business planning, and lecture slides for each chapter.

Accounting - Paul D. Kimmel 2010-12-01

With this fourth edition, accountants will acquire a practical set of tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a "macro- to micro-" strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.

Financial Analysis and Decision Making - David Vance 2002-11-23
