International Criminal Evidence - Richard May
2021-10-25
This book provides practitioners, scholars and

students with an in-depth analysis of the law of evidence before international criminal tribunals. It treats subjects such as admissibility; hearsay;

identification evidence; forensic and documentary evidence. It also discusses procedural issues arising from fair trial rights, state cooperation, witness protection, and the compulsive powers of the court. The main focus of this work is the practice of the United Nations ad hoc International Criminal Tribunals for the former Yugoslavia and Rwanda. However, it traces the developments of the law of evidence back to the trials conducted by the Allied powers after the Second World War. The authors also discuss the future of the law in this field, with comments on the projected implementation of the Statute and the Rules of Procedure of the permanent International Criminal Court. They conclude with some general remarks on trends in international criminal evidence that will be helpful to international tribunals, "mixed" tribunals (such as those proposed for Sierra Leone and Cambodia), and national courts alike. Published under the Transnational Publishers imprint.

The Waste-Free World - Ron Gonen

2021-04-06

The next revolution in business will provide for a sustainable future, from founder, CEO and circular economy expert Ron Gonen Our take-make-waste economy has cost consumers and taxpayers billions while cheating us out of a habitable planet. But it doesn't have to be this way. The Waste-Free World makes a persuasive, forward-looking case for a circular economic model, a "closed-loop" system that wastes no natural resources. Entrepreneur, CEO and sustainability expert Ron Gonen argues that circularity is not only crucial for the planet but holds immense business opportunity. As the founder of an investment firm focused on the circular economy, Gonen reveals brilliant innovations emerging worldwide— "smart" packaging, robotics that optimize recycling, nutrient rich fabrics, technologies that convert food waste into energy for your home, and many more. Drawing on his experience in technology,

business, and city government and interviews with leading entrepreneurs and top companies, he introduces a vital and growing movement. The Waste-Free World invites us all to take part in a sustainable and prosperous future where companies foster innovation, investors recognize long term value creation, and consumers can align their values with the products they buy. *Through the Global Lens* - Michael J. Strada 2021-04-14

Through the Global Lens uses a global perspective to analyze human affairs. This text looks at each of the six social sciences (sociology, anthropology, political science, economics, psychology, and geography), and uses case studies, feature film analyses, maps, and photos to highlight important historical events and concepts throughout.

A major contribution to the debate about the reconstruction of Kosovo, and to the general discussion surrounding the revived 'trusteeship

institution' model in the context of the UN internationalism of the 1990s and the War on Terror following 9/11. Bringing together leading international scholars, this book presents the latest empirical research alongside detailed theoretical analysis. Examining the key questions local parties and the international community have encountered in Kosovo, including how to develop effective and inclusive local government, how to counter crime and the dysfunctional aspects of liberal economic reform, how to unite the partly opposed goals of reconstructing the province while avoiding renewed ethnic and international strife, and how to handle the specific challenge of Kosovo's future status. The contributors also re-examine the background factors that continue to influence and hamper the attempt to administrate and reconstruct the province, first of all the nationalist ideologies and the record of ethnic violence. This book will be of great interest to all students of Balkan politics,

peacekeeping, international relations and security studies in general.

Military-civilian Interactions - Thomas George Weiss 2005

Updated to include discussion of Afghanistan & Iraq, this text explores the recent history of military-civilian interaction in the context of international military intervention, & develops a framework for assessing military costs against civilian benefits.

Would the World Be Better Without the UN? - Thomas G. Weiss 2018-02-20

Do we need the United Nations? Where would the contemporary world be without its largest intergovernmental organization? And where could it be had the UN's member states and staff performed better? These fundamental questions are explored by the leading analyst of UN history and politics, Thomas G. Weiss, in this hard-hitting, authoritative book. While counterfactuals are often dismissed as academic contrivances, they can serve to focus the mind;

and here, Weiss uses them to ably demonstrate the pluses and minuses of multilateral cooperation. He is not shy about UN achievements and failures drawn from its ideas and operations in its three substantive pillars of activities: international peace and security; human rights and humanitarian action; and sustainable development. But, he argues, the inward-looking and populist movements in electoral politics worldwide make robust multilateralism more not less compelling. The selection of António Guterres as the ninth UN secretary-general should rekindle critical thinking about the potential for international cooperation. There is a desperate need to reinvigorate and update rather than jettison the United Nations in responding to threats from climate change to pandemics, from proliferation to terrorism. Weiss tells you why and how.

Global Politics in the 21st Century - Robert J. Jackson 2013-09-16

Objective, critical, optimistic, and with a global

focus, this textbook combines international relations theory, history, up-to-date research, and current affairs to give the student a comprehensive, unbiased understanding of international politics. It integrates theory and traditional approaches with globalization and research on newer topics such as terrorism, the rise of new economic superpowers, and the impact of global communications and social networking to offer the ideal breadth and depth of coverage for a one-semester undergraduate course. Student learning is supported and enhanced by box features and "Close Up" sections with context and further information, "Critical Case Studies" that highlight controversial and complex current affairs topics and show how the world works in practice, and questions to stimulate discussion, review key concepts, and encourage further study. It brilliantly demonstrates the significance and interconnectiveness of globalization and new security challenges in the 21st century and

illuminates the role of leadership in transnational crises.

Handbook of Social Problems - George Ritzer 2004

Provides a comparative perspective on the state of social problems and deviance in a variety of societies around the world. This book explores the theory of the weakness of the strong, in other words, strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies.

Issues in American Political Life - Robert G. Thobaben 1995

This text is an introduction to the nature of major policy issues confronting American society and government. New to this edition is a chapter on health care and updated chapters on corruption, crime, terrorism and arms control.

Issues in American Political Life - Robert Thobaben 2015-07-02

A core text for undergraduate courses in American Public Policy, or supplemental reading

in such courses as Introduction to American Government or Politics, American Public Policy Analysis, Introduction to Political Science. A substantive alternative to typical "issues" texts- which cover too many issues, too superficially- this intriguing and comprehensive text offers a more in-depth and coherent approach to contemporary policy problems and solutions. It provides a conceptual framework in which students can become comfortable actually doing policy analysis, and in learning skills beyond reading about certain political issues.

Thematically organized, it looks at nine specific issues grouped into three broad categories that hold an enduring importance in American political life- money and politics, violence and politics, and biology and politics. All nine chapters and their respective topics (campaigns, corruption, welfare, crime, terrorism, arms control, the environment, biomedical issues, and biotechnology) have a strong conceptual base with current political dimensions and policy

concerns woven throughout. Students not only learn the context, status, and prospects of issues confronting the U.S. government, but also see how these issues now cross our domestic borders into a global realm.

Faulkner, Aviation, and Modern War - Michael Zeitlin 2021-12-02

Faulkner, Aviation, and Modern War frames William Faulkner's airplane narratives against major scenes of the early 20th century: the Great War, the rise of European fascism in the 1920s and 30s, the Second World War, and the aviation arms race extending from the Wright Flyer in 1903 into the Cold War era. Placing biographical accounts of Faulkner's time in the Royal Air Force Canada against analysis of such works as *Soldiers' Pay* (1926), "All the Dead Pilots" (1931), *Pylon* (1935), and *A Fable* (1954), this book situates Faulkner's aviation writing within transatlantic historical contexts that have not been sufficiently appreciated in Faulkner's work. Michael Zeitlin unpacks a broad selection

of Faulkner's novels, stories, film treatments, essays, book reviews, and letters to outline Faulkner's complex and ambivalent relationship to the ideologies of masculine performance and martial heroism in an age dominated by industrialism and military technology.

Challenges for Humanitarian Intervention - C. A. J. Coady 2018

Ten new essays critique the practice armed humanitarian intervention, and the 'Responsibility to Protect' doctrine that advocates its use under certain circumstances. The contributors investigate the causes and consequences, as well as the uses and abuses, of armed humanitarian intervention. One enduring concern is that such interventions are liable to be employed as a foreign policy instrument by powerful states pursuing geo-political interests. Some of the chapters interrogate how the presence of ulterior motives impact on the moral credentials of armed humanitarian intervention. Others shine a light on the potential adverse

effects of such interventions, even where they are motivated primarily by humanitarian concern. The volume also tracks the evolution of the R2P norm, and draws attention to how it has evolved, for better or for worse, since UN member states unanimously accepted it over a decade ago. In some respects the norm has been distorted to yield prescriptions, and to impose constraints, fundamentally at odds with the spirit of the R2P idea. This gives us all the more reason to be cautious of unwarranted optimism about humanitarian intervention and the Responsibility to Protect.

Herbert Schiller - Richard Maxwell 2003
Herbert I. Schiller (1919-2000) has been called America's most original and influential media analyst of the left in the twentieth century. Global Issues 1999-2000 - Robert Jackson
1999-03

This reader of public press articles explores views on the future state of life on earth, population issues, natural resources, political economy, conflict, and the state of peace in the international community.

Human Rights in the Twentieth Century - Stefan-Ludwig Hoffmann 2010-12-13

Has there always been an inalienable 'right to have rights' as part of the human condition, as Hannah Arendt famously argued? The contributions to this volume examine how human rights came to define the bounds of universal morality in the course of the political crises and conflicts of the twentieth century. Although human rights are often viewed as a self-evident outcome of this history, the essays collected here make clear that human rights are a relatively recent invention that emerged in contingent and contradictory ways. Focusing on specific instances of their assertion or violation

during the past century, this volume analyzes the place of human rights in various arenas of global politics, providing an alternative framework for understanding the political and legal dilemmas that these conflicts presented. In doing so, this volume captures the state of the art in a field that historians have only recently begun to explore.

Managing Development In The Third World - Coralie Bryant 2019-05-20

This is the first text to focus on the problems and processes involved in organizing, implementing, and managing programs and projects aimed at relieving poverty and underdevelopment in the Third World. During the 1970s there was a shift in development assistance programs toward a greater concern for equity and the basic needs of the poor. The auth

State Sovereignty - E. Kurtulus 2005-11-26

State sovereignty is the foundation of international relations. This thought-provoking book explores the gap between seeing

sovereignty as either absolute or relative. It argues that state sovereignty is both factual and judicial and that the 'loss' of sovereignty exists only at the margins of the international society. With many interesting real-world examples of ambiguous sovereignty examined, this is an important argument against those who are quick to claim that 'sovereignty' is under assault.

Introduction to International Relations - Robert Jackson 2012-12-13

This new edition has been updated in light of current events and ongoing debates and includes a new chapter on feminism, post-structuralism, and post-colonialism. It provides a highly readable introduction to the principal theories in international relations, combining original analysis with a range of learning features.

American Elsewhere - Robert Jackson Bennett 2014-06-11

Under a pink moon, there is a perfect little town not found on any map. In that town, there are

quiet streets lined with pretty houses, houses that conceal the strangest things. When ex-cop Mona Bright inherits her long-dead mother's home in Wink, New Mexico, she learns that the people of Wink are very, very different...

Rethinking Power, Institutions and Ideas in World Politics - Amitav Acharya 2014-01-10

The study of international relations, has traditionally been dominated by Western ideas and practices, and marginalized the voice and experiences of the non-Western states and societies. As the world moves to a "post-Western" era, it is imperative that the field of IR acquires a more global meaning and relevance. Drawing together the work of renowned scholar Amitav Acharya and framed by a new introduction and conclusion written for the volume, this book exposes the narrow meaning currently attached to some of the key concepts and ideas in IR, and calls for alternative and broader understandings of them. The need for recasting the discipline has motivated and

undergirded Acharya's own scholarship since his entry into the field over three decades ago. This book reflects his own engagement, quarrels and compromise and concludes with suggestions for new pathways to a Global IR- a forward-looking and inclusive enterprise that is reflective of the multiple and global heritage of IR in an changing and interconnected world. It is essential reading for anyone who is concerned about the history, development and future of international relations and international relations theory.

International Relations, Political Theory, and the Problem of Order - Nicholas J. Rengger 2000

This book seeks to offer a general interpretation and critique of both methodological and substantive aspects of International theory.

Global Politics as if People Mattered - Mary Ann Tétreault 2009-05-16

What would international relations look like if our theories and analyses began with individuals, families, and communities instead of executives, nation-states, and militaries? After

all, it is people who make up cities, states, and corporations, and it is their beliefs and behaviors that explain why some parts of the world seem so peaceful while others appear so violent, why some societies are so rich while others are so poor. Now in a fully updated and revised edition, this unique text on contemporary global politics begins with people, treating them as "social individuals" with free will and human agency even as they are limited and disciplined by rules and rulers. Offering a fresh approach to global politics, this dynamic author team trades perspectives with each other and with such eminent social theorists as Michel Foucault and Hannah Arendt to develop their resonant theme. Using practical examples as well as theory, the authors show students how they can take charge of their lives and the politics that affect them, even in the context of a vast global economy and impersonal international forces that sometimes seem out of control. Filled with idealism, yet firmly grounded in current realities, Global

Politics as if People Mattered is a fresh take on the proper place and potential of individuals in world politics—front and center, actively engaged in a way of life that is as politically personal as it is politically powerful. This distinctive text, a perfect reading for lower-division politics courses, helps students to carve out their own political space in the contemporary global order.

Oman Reborn - Linda Pappas Funsch
2015-12-29

The Sultanate of Oman is one of the few "good news" stories to have emerged from the Middle East in recent memory. This book traces the narrative of a little-known and relatively stable Arab country whose history of independence, legacy of interaction with diverse cultures, and enlightened modern leadership have transformed it in less than fifty years from an isolated medieval-style potentate to a stable, dynamic, and largely optimistic country. At the heart of this fascinating story is Oman's sultan,

Qaboos bin Sa'id, friend to both East and West, whose unique leadership style has resulted in both domestic and foreign policy achievements during more than four decades in office.

Exploring Oman from a historical perspective, Funsch examines how the country's unique blend of tradition and modernization has enabled it to succeed while others in the region have failed. Accounts of the author's own experiences with Oman's transformation add rich layers of depth, texture, and personality to the narrative.

Shocking the Conscience of Humanity -

Margaret M. deGuzman 2020-04-13

The most commonly cited justification for international criminal law is that it addresses crimes of such gravity that they "shock the conscience of humanity." From decisions about how to define crimes and when to exercise jurisdiction, to limitations on defences and sentencing determinations, gravity rhetoric permeates the discourse of international

criminal law. Yet the concept of gravity has thus far remained highly undertheorized. This book uncovers the consequences for the regime's legitimacy of its heavy reliance on the poorly understood idea of gravity. Margaret M. deGuzman argues that gravity's ambiguity may at times enable a thin consensus to emerge around decisions, such as the creation of an institution or the definition of a crime, but that, increasingly, it undermines efforts to build a strong and resilient global justice community. The book suggests ways to reconceptualize gravity in line with global values and goals to better support the long-term legitimacy of international criminal law.

Global Governance -

Thomas G. Weiss
2016-01-07

Friends and foes of international cooperation puzzle about how to explain order, stability, and predictability in a world without a central authority. How is the world governed in the absence of a world government? This probing

yet accessible book examines "global governance" or the sum of the informal and formal values, norms, procedures, and institutions that help states, intergovernmental organizations, civil society, and transnational corporations identify, understand, and address trans-boundary problems. The chasm between the magnitude of a growing number of global threats - climate change, proliferation of weapons of mass destruction, terrorism, financial instabilities, pandemics, to name a few - and the feeble contemporary political structures for international problem-solving provide compelling reasons to read this book. Fitful, tactical, and short-term local responses exist for a growing number of threats and challenges that require sustained, strategic, and longer-run global perspectives and action. Can the framework of global governance help us to better understand the reasons behind this fundamental disconnect as well as possible ways to attenuate its worst aspects? Thomas G. Weiss

replies with a guardedly sanguine "yes".

Empires and Autonomy - Stephen Streeeter

2010-01-01

Globalization is one of the most significant developments of our time. But which elements of contemporary globalization and forms of autonomy are novel and which are merely continuations of long-standing trends? This book brings together a distinguished group of scholars who focus on historical moments that involved the establishment or protection of autonomy, moments that inevitably involved friction. By examining the dialectic between globalization and autonomy at historical junctures ranging from the Chinese occupation of Tibet in 1720 to the meeting between Reagan and Gorbachev that led to the end of the Cold War, this volume provides novel insights into the changes overtaking our contemporary world. The Global Covenant - Robert Jackson
2000-08-03

The Global Covenant is a ground-breaking work
by one of the leading scholars in international
relations that rejuvenates the classical
international society approach, and brings it into

contact with the new era of world politics. It is a major study of international society that presents a comprehensive analysis of international peace and security, war and intervention, human rights, failed states, territories and boundaries, and democracy. It contemplates the future of international society in the 21st century. It is also a major attempt to justify the world-wide state system as a foundation of political freedom. - ;The Global Covenant is a ground-breaking work by one of the leading scholars in international relations that rejuvenates the classical international society approach, and brings it into contact with the new era of world politics. It investigates the most important international issues of our time, including peace and security, war and intervention, human rights, failed states, territories and boundaries, and democracy. It draws on a family of closely related disciplines: diplomatic and military history, international legal studies, and international political theory.

It addresses basic methodological questions and presents the elements of a human sciences approach to the study of world politics. It contemplates the future of international society in the 21st century. The Global Covenant concludes by justifying the pluralist society of sovereign states as one that respects human diversity and upholds human freedom. - ;Robert Jackson's The Global Covenant ought to rank among the most distinctive and important books of international relations theory written by a Canadian scholar ... it has much to teach those who think and teach within the discipline - Canadian Journal of Political Science;Comprehensive and well researched ... Quasi-States - Robert H. Jackson 1993-03-18
In this book, Professor Robert Jackson develops an original interpretation of Third World underdevelopment, explaining it in terms of

international relations and law. He describes Third World countries as 'quasi-states', arguing that they are states in name only, demonstrating how international changes during the post-1945 period made it possible for many quasi-states to be created and to survive despite the fact that they are usually inefficient, illegitimate and domestically unstable.

Law, Morality, and International Armed Intervention - Mourtada Deme 2013-10-14

International law is often manipulated in the debate about humanitarian intervention. The Liberian case provides an opportunity to challenge the UN and The Economic Community of West African States' (ECOWAS') new approach. ECOWAS and the UN's justifications for moving away from the current norms are flawed. No enlightened person would disagree with the values of peace, democracy, human rights, and economic development. This book, however, explores whether these goals be pursued within the current framework or outside it.

Struggles for Self-Determination - Josiah Brownell 2021-12-02

Katanga, Rhodesia, Transkei and

Bophuthatswana: four African countries that, though existing in a literal sense, were, in each case, considered by the international community to be a component part of a larger sovereign state through which all official communications and interactions were still conducted. This book is concerned with the intertwined histories of these four right-wing secessionist states in Southern Africa as they fought for but ultimately failed to win sovereign recognition. Along the way, Katanga, Rhodesia, Transkei, and Bophuthatswana each invented new national symbols and traditions, created all the trappings of independent statehood, and each proclaimed that their movements were legitimate expressions of national self-determination. Josiah Brownell provides a unique comparison between these states, viewed together as a common reaction to decolonization and the triumph of anticolonial African nationalism. Describing the ideological stakes of their struggles for sovereignty, Brownell explores the international

political controversies that their drives for independence initiated inside and outside Africa. By combining their stories, this book draws out the relationships between the emergence of these four pseudo-states and the fragility of the entire postcolonial African state structure. Signposts - Policy and practice for teaching about religions and non-religious world views in intercultural education - Robert Jackson
2014-08-01

How can the study of religions and non-religious world views contribute to intercultural education in schools in Europe? An important recommendation from the Committee of Ministers of the Council of Europe (Recommendation CM/Rec(2008)12 on the dimension of religions and non-religious convictions within intercultural education) aimed to explain the nature and objectives of this form of education. Signposts goes much further by providing advice to policy makers, schools (including teachers, senior managers

and governors) and teacher trainers on tackling issues arising from the recommendation. Taking careful account of feedback from education officials, teachers and teacher trainers in Council of Europe member states, Signposts gives advice, for example, on clarifying the terms used in this form of education; developing competences for teaching and learning, and working with different didactical approaches; creating “safe space” for moderated student-to-student dialogue in the classroom; helping students to analyse media representations of religions; discussing non-religious world views alongside religious perspectives; handling human rights issues relating to religion and belief; and linking schools (including schools of different types) to one another and to wider communities and organisations. Signposts is not a curriculum or a policy statement. It aims to give policy makers, schools and teacher trainers in the Council of Europe member states, as well as others who wish to use it, the tools to work

through the issues arising from interpretation of the recommendation to meet the needs of individual countries. Signposts results from the work of an international panel of experts convened jointly by the Council of Europe and the European Wergeland Centre, and is written on the group’s behalf by Professor Robert Jackson.

New Directions in India's Foreign Policy - Harsh V. Pant 2019-03-21

India's foreign policy has witnessed a dramatic transformation since the end of the Cold War. Though academic study of Indian foreign policy has also shown a degree of maturity, theoretical developments have been underwhelming. Scholars have introduced new concepts and examined Indian foreign policy through new prisms, but a cohesive research agenda has not yet been charted. This volume intends to fill that void. It brings together new cutting-edge research in the field of Indian foreign policy - both at the theoretical and empirical level - so as

to shape the discourse on foreign policy of one of the most important players in global politics. This volume explores key concepts like 'constructivism' and 'territoriality' and analyses their contribution to the academic discourse on Indian foreign policy. Issues such as the 'Indo-Pacific' and the 'responsibility to protect' have also been examined to address the expanding horizons of Indian foreign policy.

The Creation of States in International Law -
James R. Crawford 2007-03-15

Statehood in the early 21st century remains as much a central problem as it was in 1979 when the first edition of *The Creation of States in International Law* was published. As Rhodesia, Namibia, the South African Homelands and Taiwan then were subjects of acute concern, today governments, international organizations, and other institutions are seized of such matters as the membership of Cyprus in the European Union, application of the Geneva Conventions to Afghanistan, a final settlement for Kosovo, and,

still, relations between China and Taiwan. All of these, and many other disputed situations, are inseparable from the nature of statehood and its application in practice. The remarkable increase in the number of States in the 20th century did not abate in the twenty five years following publication of James Crawford's landmark study, which was awarded the American Society of International Law Prize for Creative Scholarship in 1981. The independence of many small territories comprising the 'residue' of the European colonial empires alone accounts for a major increase in States since 1979; while the disintegration of Yugoslavia and the USSR in the early 1990s further augmented the ranks. With these developments, the practice of States and international organizations has developed by substantial measure in respect of self-determination, secession, succession, recognition, de-colonization, and several other fields. Addressing such questions as the unification of Germany, the status of Israel and

Palestine, and the continuing pressure from non-State groups to attain statehood, even, in cases like Chechnya or Tibet, against the presumptive rights of existing States, James Crawford discusses the relation between statehood and recognition; the criteria for statehood, especially in view of evolving standards of democracy and human rights; and the application of such criteria in international organizations and between states. Also discussed are the mechanisms by which states have been created, including devolution and secession, international disposition by major powers or international organizations and the institutions established for Mandated, Trust, and Non-Self-Governing Territories. Combining a general argument as to the normative significance of statehood with analysis of numerous specific cases, this fully revised and expanded second edition gives a comprehensive account of the developments which have led to the birth of so many new states.

Fifty Key Thinkers in International Relations - Martin Griffiths 1999

This unique reference offers a quick and convenient overview of the key thinkers in international relations in the twentieth century. The inclusive coverage ranges from politicians such as Lenin and Kissinger, to the most influential figures in feminism, nationalist studies and even historical sociology. Each entry describes the main elements of each thinker's contribution to the study of international relations, provides relevant information on his or her life and career, and lists valuable suggestions for further reading and critical analysis. Political science and journalism students, media professionals and anyone with an interest in modern international relations will want this useful work.

Introduction to International Relations - Robert H. Jackson 2016

A succinct introduction to the principal international relations theories with an emphasis on how theory can be used to analyse key global issues.
