Handbook of Intercultural Training - Dan Landis 2013-10-22

Handbook of Intercultural Training, Volume II: Issues in Training Methodology is a major attempt to describe, critique, and summarize the

major known ways to provide cross-cultural training. The collection of essays discusses the stresses of intercultural encounter, as well as how to reduce these. This volume is divided in two parts. The first part discusses context factors, including stress factors in intercultural relations and aspects of organization effectiveness. A cross-cultural experience from the perspective of a program manager is presented, as well as a situational analysis and designing a translator-based training program where alternative designs are forwarded for trainers to use effectively in multicultural and multilingual environments. The second part presents different methods of training. Learning from sojourners and from individuals from various cultures results in different frameworks for interpreting cross-cultural interactions. Consultants, advisors, and experts may find themselves performing outside and beyond their home ground and social groups, so training programs pertaining to their particular situation need to be addressed more profoundly. The training program in race relations by the U.S. Department of Defense is reviewed, and the effects of stereotyping people are discussed and considered as other factors in the preparation of training programs. English is then examined as a tool for intercultural communication, where aspects of intercultural training should be integrated. This book is suitable for overseas workers, foreign students, foreign technical advisers, diplomats, immigrants, and many others who are going to live and work and be exposed to other cultures.

The Handbook of Communication in Cross-cultural Perspective - Donal Carbaugh 2016-08-19

This handbook brings together 26 ethnographic research reports from

around the world about communication. The studies explore 13 languages from 17 countries across 6 continents. Together, the studies examine, through cultural analyses, communication practices in cross-cultural perspective. In doing so, and as a global community of scholars, the studies explore the diversity in ways communication is understood around the world, examine specific cultural traditions in the study of communication, and thus inform readers about the range of ways communication is understood around the world. Some of the communication practices explored include complaining, hate speech, irreverence, respect, and uses of the mobile phone. The focus of the handbook, however, is dual in that it brings into view both communication as an academic discipline and its use to unveil culturally situated practices. By attending to communication in these ways, as a discipline and a specific practice, the handbook is focused on, and will be an authoritative resource for understanding communication in cross-cultural perspective. Designed at the nexus of various intellectual traditions such as the ethnography of communication, linguistic ethnography, and cultural approaches to discourse, the handbook employs, then, a general approach which, when used, understands communication in its particular cultural scenes and communities.
