Tourism and War - Richard Butler 2013-05-07

This is the first volume to fully explore the complex relationship between war and tourism by considering its full range of dynamics; including political, psychological, economic and ideological factors at different levels, in different political and geographical locations. Issues of peace and tourism are dealt with insofar as they pertain to the effects of war on tourism that emerge after the cessation of hostilities. The book therefore reveals how not only location, but also political strategies, accidents of history, transportation linkages, and economic expediency all have played their role in the development and continuation of tourism before, during, and after wartime. It further shows how the effects of war are seldom if ever simply a negation or reversal of the effects of peace on tourism. The volume draws on a range of examples, from medieval times to the present, to reveal the multi-faceted development of tourism amidst and because of conflict in a wide variety of locations, including the Pacific, Europe, the Middle East, North America, Africa and South East Asia, showing the diverse ways in which tourism and war interact. In doing so it explores how some locations have been developed as tourist attractions primarily because of war and conflict, e.g. as resting and training places for troops, and others flourished because of the threat of danger from conflicts to more traditional tourist locations. This thought-provoking volume contributes to the understanding of the interrelationships between war, peace and tourism in many different parts of the world at different scales. It will be valuable reading for all those interested in this topic as well as dark tourism, battlefield tourism and heritage tourism.

Phase I Cancer Clinical Trials - Elizabeth A. Eisenhauer 2015-03-20

Phase I trials are a critical first step in the study of novel cancer therapeutic approaches. Their primary goals are to identify the recommended dose, schedule and pharmacologic behavior of new agents or new combinations of agents and to describe the adverse effects of treatment. In cancer therapeutics, such studies have particular challenges. Due to the nature of the effects of treatment, most such studies are conducted in patients with advanced malignancy, rather than in healthy volunteers. Further, the endpoints of these trials are usually measures adverse effects rather than molecular target or anti-tumor effects. These factors render the design, conduct, analysis and ethical

aspects of phase I cancer trials unique. As the only comprehensive book on this topic, Phase I Cancer Clinical Trials is a useful resource for oncology trainees or specialists interested in understanding cancer drug development. New to this edition are chapters on Phase 0 Trials and Immunotherapeutics, and updated information on the process, pitfalls, and logistics of Phase I Trials

Alphabeatz - Woshe 2019-08-20

Graffiti writing was born in the streets of Philadelphia in the late 1960s. But it was in New York in the early 1970s that it became a full-fledged urban art, gradually taking over the landscape of the city, from its walls to its subway cars. This is a writing manual, a detailed examination of how graffiti writers have developed the twenty-six letters of the alphabet. It includes the contribution of ten of the international scene's most talented creators answer Woshe's questions about matters that include their practice, their relationship with letters and their backgrounds. It includes a map of New York with the sites where the most important graffiti are located.

Canonical Theism - William Abraham 2008-02-18

Canonical Theism is a post-Protestant vision for the renewal of both theology and church. The editors call for the retrieval and redeployment of the full range of materials, persons, and practices that make up the canonical heritage of the church, including scripture, doctrine, sacred image, saints, sacraments, and more. The central thesis of the work is that the good and life-giving Holy Spirit has equipped the church with not only a canon of scripture but also with a rich canonical heritage of materials, persons, and practices. However, much of the latter has been ignored or cast aside. This unplumbed resource of canonical heritage waits for the church to rediscover its wealth. With a bold set of thirty theses, the authors chart and defend that mine of opportunity. They then invite the entire church to explore the benefits of their discoveries. This ambitious book offers insights to be integrated into the church body, renewing the faith that nourished converts, created saints, and upheld martyrs across the years.

When October Starts - Seven Rue 101-01-01
JUNIPER As his student, I should've kept my distance. Out of all the guys in the world I could've fallen in love with, it had to be my new teacher. We fell in love slowly, hidden from others. Keeping it secret, and falling deeper each day. But no love is perfect, and we learned it the hard way. When the truth came out and he left town, he left me broken and alone. He's to blame, at least that's what everyone says. But to me, he's still the greatest man I've ever gotten to love. And when October starts, no one can tear us apart.

Besh Big Easy - John Besh 2015-09-29

In this, his fourth big cookbook, the award-winning chef John Besh takes another deep dive into the charm and authenticity of creole cooking inspired by his hometown, New Orleans. Besh Big Easy: 101 Home-Cooked New Orleans Recipes, is a fresh and delightful new look at his signature food. Besh Big Easy will feature all new recipes and easy dishes, published in a refreshing new flexibound format and accessible to cooks everywhere. Much has changed since Besh wrote his bestselling My New Orleans in 2009. His restaurant empire has grown from two to twelve acclaimed eateries, from the highly praised Restaurant August to the just opened farm-to-table taqueria, Johnny Sanchez. John's television career has blossomed as well. He's become known to millions as host of two national public television cooking shows based on his books and of Hungry Investors on Spike TV. Besh Big Easy is dedicated to accessibility in home cooking and Orleans cuisine. "There's no reason a good jambalaya needs two dozen ingredients," John says. In this book, jambalaya has less than ten, but sacrifices nothing in the way of flavor and even offers exciting yet simple substitutions. With 101 original, personal recipes such as Mr. Sam's Stuffed Crabs, Duck Camp Shrimp & Grits, and Silver Queen Corn Pudding, Besh Big Easy is chock-full of the vivid personality and Louisiana flavor that has made John Besh such a popular American culinary icon. Happy eating!

Skinny White Freak - Paul Haddad 2016-07-11

Los Angeles, 1978. Skateboarding and tanned bods rule the SoCal landscape. Compared to his groovy peers, 13-year-old Adam Lipsitz is an outcast. He is too skinny, too pale, too brainy. To make matters worse, just as his parents are separating, he's cast off to Kamp Kickapoo, where he faces the prospect of being tormented by a bully named "Worm" for six interminable weeks. Then... a horrific event rocks Adam's world. And there's no turning back. How Adam deals with being bullied forms the core of *Skinny White Freak*. By summer's end, Adam will make the journey from kid to young adult, striving to replace fear with courage, cynicism with empathy, and low self-esteem with self-acceptance.

The Remedy - Zena Sharman 2016-10-24

To remedy means to heal, to cure, to set right, to make reparations. The Remedy invites writers and readers to imagine what we need to create healthy, resilient, and thriving LGBTQ communities. This anthology is a diverse collection of real-life stories from queer and trans people on their own health-care experiences and challenges, from gay men living with HIV who remember the systemic resistance to their health-care needs, to a lesbian couple dealing with the experience of cancer, to young trans people who struggle to find health-care providers who treat them with dignity and respect. The book also includes essays by health-care providers, activists and leaders with something to say about the challenges, politics, and opportunities surrounding LGBTQ health issues. Both exceptionally moving and an incendiary call-to-arms, *The Remedy* is a must-read for anyone—gay, straight, trans, and otherwise—passionately concerned about the right to proper health care for all. Contributors include Amber Dawn, Sinclair Sexsmith, Francisco Ibanez-Carrasco, Cooper Lee Bombardier, Kara Sievewright, and Kelli Dunham. Zena Sharman is a passionate advocate for queer and trans health. She has over a decade's experience in health research; currently she is Director of Strategy at the Michael Smith Foundation for Health Research. Zena is also co-editor of *Persistence: All Ways Butch and Femme*. She lives in Vancouver, British Columbia.

Colonial Lives - Richard E. Boyer 2000

Colonial Lives offers a rich variety of archival documents in translation which bring to life the political and economic workings of Latin American colonies during 300 years of Spanish rule, as well as the day-to-day lives of the colonies' inhabitants. Intended to complement textbooks such as Burkholder and Johnson's *Colonial Latin America* by presenting students with primary sources -- the raw materials on which the facts in other textbooks are based -- this reader strives to illustrate the impact of issues such as race, class, gender, sexuality, culture and religion in the daily lives of both natives and colonists alike. The concerns, struggles and perspectives of the inhabitants of colonial Latin America are reflected in transcripts of civil and criminal court cases, administrative reviews, ecclesiastical investigations, Inquisition trials, wills, and letters the editors have included in this reader. Each document is prefaced by an introduction that places it in the social and political context of the period. The book also includes a glossary of terms and lists of suggested further readings. Most uniquely, the book offers helpful thematic cross-referencing sections and an index of themes which allow instructors to easily adapt the book to their courses and to assign readings according to the criteria of their own specific curriculums.

Atlas of CT Angiography - Gratian Dragoslav Miclaus 2014-06-26

This atlas presents normal and pathologic findings observed on CT angiography with 3D reconstruction in a diverse range of clinical applications, including the imaging of cerebral, carotid, thoracic, coronary, abdominal and peripheral vessels. The superb illustrations display the excellent anatomic detail obtained with CT angiography and depict the precise location of affected structures and lesion severity. Careful comparisons between normal imaging features and pathologic appearances will assist the reader in image interpretation and treatment planning and the described cases include some very rare pathologies. In addition, the technical principles of the modality are clearly explained and guidance provided on imaging protocols. This atlas will be of value both to those in training and to more experienced practitioners within not only radiology but also cardiovascular surgery, neurosurgery, cardiology and neurology.

Genealogies of Art, Or the History of Art As Visual Art - Manuel Fontan del Junco 2020-01-21

How artists, historians and theorists have diagrammed art's lineages, from the Middle Ages to Fluxus *Genealogies of Art* analyzes the visual representations of art history made by artists, critics, designers, theorists and poets alike, from the genealogical trees of the 12th through the 15th centuries and the Renaissance to more recent information graphics, including paintings, sketches, maps, plans, prints, drawings and diagrams. The conceptual core of the book is the famed chart that Alfred H. Barr, first director of the Museum of Modern Art, composed for the cover of his landmark exhibition *Cubism and Abstract Art* in 1936, which sought to trace the origins of abstract art from 1890 to 1936.

Around this paradigmatic chart is gathered a tremendous pageant of works by great polymaths and thinkers, including Guy Debord's situationist maps; the Guerrilla Girls' "Guerrillas in the Midst of History"; Athanasius Kircher's baroque-era trees of knowledge; George Maciunas' Fluxus diagrams; André Malraux's Museum without Walls; Otto Neurath's charts and isotypes; Ad Reinhardt's collaged histories of art; Ward Shelley's Who Invented the Avant-Garde?; Maurice Stein, Larry Miller and Marshall Henrichs' Blueprint for Counter Education; Aby Warburg's legendary Mnemosyne Atlas; and many others. Across 450 pages, *Genealogies of Art* reproduces more than 500 images. In addition to these, Astrit Schmidt-Burkhardt contributes an essay titled "The Diagrammatic Shift," following by Manuel Lima's "Trees of Knowledge: The Diagrammatic Traditions of the Middle Ages and the Renaissance," both of which contextualize the relevance of this form throughout history. Uwe Fleckner explores the use of diagrammatic visualization in curatorial and collecting activities, as in the cases of Carl Einstein or Aby Warburg; and the Picasso specialist Eugenio Carmona looks at Alfred H. Barr's conception of Picasso's work, in his text "Barr, Cubism and Picasso: Paradigm and 'Anti-paradigm.'"

Karlology - Karl Pilkington 2008-11-17

Karl Pilkington's third book, follow-up to bestselling *The World of Karl Pilkington* and *Happyslapped by a Jellyfish*, is a voyage through some of the most curious facts and fictions about our world. Drawing on what little he learned during his days of education, Karl explores the world of knowledge through a school curriculum, with chapters devoted to biology, history, art, and English, among others, each topic approached with Karl's inimitable combination of innocent wonder and down-to-earth wisdom. Full color throughout, the book is illustrated with Karl's hand-drawn cartoons and comic strips and it features e-mail contributions from a host of celebrities and experts who Karl has quizzed to further his knowledge. Read Karl's blog at <http://www.karlology.co.uk>

An Untamed Land (Red River of the North Book #1) - Lauraine Snelling 2006-05-01

Proud of Their Heritage and Sustained by Their Faith, They Came to

Tame a New Land She had promised herself that once they left the fjords of Norway, she would not look back. After three long years of scrimping and saving to buy tickets for their passage to America, Roald and Ingeborg Bjorklund, along with their son, Thorliff, finally arrive at the docks of New York City. It was the promise of free land that fed their dream and lured them from their beloved home high above the fjords of Norway in 1880. Together with Roald's brother Carl and his family, they will build a good life in a new land that promises untold wealth and vast farmsteads for their children. As they join the throngs of countless immigrants passing through Castle Garden, they soon discover that nothing is as they had envisioned it. Appalled by the horrid stories of fellow immigrants bilked of all their money and forced to live in squalid living conditions, the Bjorklunds continue their long journey by train as far as Grand Forks. From there a covered wagon takes them into Dakota Territory, where they settle on the banks of the Red River. But there was no way for them to foresee the price they will have to pay to wrest a living from the indomitable land. The virgin prairie refuses to yield its

treasure without a struggle. Will they be strong enough to overcome the hardships of that first winter?

308 Circuits - Jan Buiting 2003

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.
