*Routledge Handbook of Interpretive Political Science* - Mark Bevir  
2015-07-03

Interpretive political science focuses on the meanings that shape actions and institutions, and the ways in which they do so. This Handbook explores the implications of interpretive theory for the study of politics. It provides the first definitive survey of the field edited by two of its pioneers. Written by leading scholars from a range of disciplinary backgrounds, the Handbook's 32 chapters are split into five parts which explore: the contrast between interpretive theory and mainstream political science; the main forms of interpretive theory and the theoretical concepts associated with interpretive political science; the methods used by interpretive political scientists; the insights provided by interpretive political science on empirical topics; the implications of interpretive political science for professional practices such as policy analysis, planning, accountancy, and public health. With an emphasis on the applications of interpretive political science to a range of topics and disciplines, this Handbook is an invaluable resource for students, scholars, and practitioners in the areas of international relations, comparative politics, political sociology, political psychology, and public administration.

[Imagining Africa](#) - Clive Gabay 2018-11-30

There has been a long history of idealism concerning the potential of economic and political developments in Africa, the latest iteration of which emerged around the time of the 2007-8 global financial crisis.

Here, Clive Gabay takes a historical approach to questions concerning change and international order as these apply to Africa in Western imaginaries. Challenging traditional postcolonial accounts that see the West imagine itself as superior to Africa, he argues that the centrality of racial anxieties concerning white supremacy make Africa appear, at moments of Western crisis, as the saviour of Western ideals, specifically democracy, bureaucracy, and neoclassical economic order. Uncommonly, this book turns its lens as much inwards as outwards, interrogating how changing attitudes to Africa over the course of the twentieth and early twenty-first centuries correspond to shifting anxieties concerning whiteness, and the growing hope that Africa will be the place where the historical genius of whiteness might be saved and perpetuated.

**Peace Formation and Political Order in Conflict Affected Societies**

- Oliver P. Richmond 2016

International actors, including key states like the US and organizations such as the UN, EU, African Union, and World Bank, and a range of NGOs, have long been confronted with the question of how to achieve an emancipatory form of peace. This book argues that the localized formation of peace has not been examined closely enough. Yet it provides important 'navigation points for policymakers' and the crucial and, so far, often-missing legitimacy for wider peacebuilding and statebuilding efforts.

**Routledge Handbook of International Statebuilding** - David Chandler 2013-09-02

This new Handbook offers a combination of theoretical, thematic and empirical analyses of the statebuilding regime, written by leading international scholars. Over the past decade, international statebuilding has become one of the most important and least understood areas of international policy-making. Today, there are around one billion people living in some 50-60 conflict-affected, 'fragile' states, vulnerable to political violence and civil war. The international community grapples with the core challenges and dilemmas of using outside force, aid, and persuasion to build states in the wake of conflict and to prevent such countries from lapsing into devastating violence. The Routledge

Handbook of International Statebuilding is a comprehensive resource for this emerging area in International Relations. The volume is designed to guide the reader through the background and development of international statebuilding as a policy area, as well as exploring in depth significant issues such as security, development, democracy and human rights. Divided into three main parts, this Handbook provides a single-source overview of the key topics in international statebuilding: Part One: Concepts and Approaches Part Two: Security, Development and Democracy Part Three: Policy Implementation This Handbook will be essential reading for students of statebuilding, humanitarian intervention, peacebuilding, development, war and conflict studies and IR/Security Studies in general.

**African Guerrillas** - Morten Bøås 2007

?This is a major contribution to our understanding of the motives and circumstances behind some of the most brutal civil wars on the continent.??Rene Lemarchand, University of Florida?A sophisticated and detailed treatment of contemporary African civil wars that goes well beyond earlier contributions.??M. Crawford Young, University of Wisconsin?MadisonAt the center of many of Africa?s violent conflicts are movements that do not seem to fit any established theories of armed resistance. African Guerrillas offers new models for understanding these movements, eschewing one-dimensional explanations. The authors build on?and in some cases debate?the insights provided in Christopher Clapham?s groundbreaking work. They find a new generation of fighters?one that reflects rage against the machinery of a dysfunctional state. Their analysis of this phenomenon, combining thematic chapters and a range of representative case studies, is a crucial contribution to any effort to understand Africa?s war-torn societies. **Fixing Fragile States: A New Paradigm for Development** - Seth D.

Kaplan 2008-06-30

Fragile states are a menace. Their lawless environments spread instability across borders, provide havens for terrorists, threaten access to natural resources, and consign millions of people to poverty. But Western attempts to reform these benighted places have rarely made things better. Kaplan argues that to avoid revisiting the carnage and catastrophes seen in places like Iraq, Bosnia, and the Congo, the West needs to rethink its ideas on fragile states and start helping their peoples build governments and states that actually fit the local landscape. Fixing Fragile States lays bare the fatal flaws in current policies and explains why the only way to give these places a chance at peace and prosperity is to rethink how development really works. Flawed governance systems, not corrupt bureaucrats or armed militias, are the cancers that devour weak states. The cure, therefore, is not to send more aid or more peacekeepers but to redesign political, economic, and legal structures-to refashion them so they can leverage local traditions, overcome political fragmentation, expand governance capacities, and catalyze corporate investment. After dissecting the reasons why some states prosper and others sink into poverty and violence, Fixing Fragile States visits seven deeply dysfunctional places—including Pakistan, Bolivia, West Africa, and Syria—and explains how even the most desperate of them can be transformed.

**The International Relations of Sub-Saharan Africa** - Ian Taylor

**Recentering Africa in International Relations** - Marta Iñiguez de Heredia 2018-02-22

This innovative book responds to an existing demand for taking Africa out of a place of exception and marginality, and placing it at the center of international relations and world politics. Bringing together a number of scholars from various disciplinary backgrounds to stage a critical intervention into the problematic ways Africa is accounted for in the dominant discourses of international relations and global politics, it

challenges the structural and epistemic biases of IR that render the contributions of the continent invisible, and situates the continent as a global region that exists beyond notions of lack, disorder, and failure. Through these interventions, the volume contributes to a rethinking of IR, and the conditions of possibility for imagining a world otherwise beyond frames that fetishize Africa paradoxically as transparent and invisible.

**Identity and Global Politics** - P. Goff 2004-07-20

This collected volume draws together essays written by International Relations scholars from a variety of regional, methodological and theoretical perspectives to confront the challenges of identity-centered analysis. In particular, the contributors seek to elucidate the general meaning and methodological implications of the commonly state yet largely unexamined, assertion that identities are relational, fluid, constructed, and multiple.

The Rumble in the Jungle - Lewis A. Erenberg 2021-09-14

The 1974 fight between Muhammad Ali and George Foreman, staged in the young nation of Zaire and dubbed the Rumble in the Jungle, was arguably the biggest sporting event of the twentieth century. The bout between an ascendant undefeated champ and an outspoken master trying to reclaim the throne was a true multimedia spectacle. A three-day festival of international music—featuring James Brown, Miriam Makeba, and many others—preceded the fight itself, which was viewed by a record-breaking one billion people worldwide. Lewis A. Erenberg's new book provides a global perspective on this singular match, not only detailing the titular fight but also locating it at the center of the cultural dramas of the day. *The Rumble in the Jungle* orbits around Ali and Foreman, placing them at the convergence of the American Civil Rights movement and the Great Society, the rise of Islamic and African liberation efforts, and the ongoing quest to cast off the shackles of colonialism. With his far-reaching take on sports, music, marketing, and mass communications, Erenberg shows how one boxing match became nothing less than a turning point in 1970s culture.

**Handbook of Ethnic Conflict** - Dan Landis 2012-02-14

Although group conflict is hardly new, the last decade has seen a proliferation of conflicts engaging intrastate ethnic groups. It is estimated that two-thirds of violent conflicts being fought each year in every part of the globe including North America are ethnic conflicts. Unlike traditional warfare, civilians comprise more than 80 percent of the casualties, and the economic and psychological impact on survivors is often so devastating that some experts believe that ethnic conflict is the most destabilizing force in the post-Cold War world. Although these conflicts also have political, economic, and other causes, the purpose of this volume is to develop a psychological understanding of ethnic warfare. More specifically, *Handbook of Ethnopolitical Conflict* explores the function of ethnic, religious, and national identities in intergroup conflict. In addition, it features recommendations for policy makers with the intention to reduce or ameliorate the occurrences and consequences of these conflicts worldwide.

**Everyday resistance, peacebuilding and state-making** - Marta

Iñiguez de Heredia 2017-04-27

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. *Everyday resistance, peacebuilding and state-making* addresses debates on the liberal peace and the policies of peacebuilding through a theoretical and empirical study of resistance in peacebuilding contexts. Examining the case of 'Africa's World War' in the DRC, it locates resistance in the experiences of war, peacebuilding and state-making by exploring discourses, violence and everyday forms of survival as quotidian acts that attempt to challenge or mitigate such experiences. The analysis of resistance offers a possibility to bring the historical and sociological aspects of both peacebuilding and the case of the DRC, providing new nuanced understanding on these processes and the particular case. The book also makes a significant contribution to the theorisation of resistance in International Relations.

*Harry Potter and International Relations* - Daniel H. Nexon 2006-05-25

Why not take seriously the claim that Harry Potter's world intertwines with our own? In this timely yet otherworldly volume, more than a dozen

scholars of international relations join hands to demonstrate how this well-loved artifact of popular culture reflects and shapes our own lifeworld. A wide range of historical and sociological sources shows how Harry's world contains aspects of our own. Practices such as quidditch dovetail quite clearly with 'muggle' sports, and the very British-ness of the books has, in translation into languages such as Turkish and Arabic, been transformed to reflect these unique cultures. Chapters on the political economy of the franchise as well as the scholarly problems of studying popular culture frame what is essentially a highly info-taining read.

*TRIUMPH OF RACISM: The History of White Supremacy in Africa and How Shithole Entered the U.S Presidential Lexicon* - Emmanuel Neba-Fuh 2021-04-05

Emmanuel Neba-Fuh in this comprehensive chronological compilation and thorough narrative of the history of white supremacy in Africa provide an unflinching fresh case that African poverty - a central tenet of the "shithole" demonization, is not a natural feature of geography or a consequence of culture, but a direct product of imperial extraction from the continent - a practice that continues into the present. A brutal and nefarious tale of slave trade, genocides, massacres, dictators supported, progressive leaders murdered, weapon-smuggling, cloak-and-dagger secret services, corruption, international conspiracy, and spectacular military operations, he raised the most basic and fundamental question - how was Africa (the world's richest continent) raped and reduced to what Donald J. Trump called "shithole?" (V. Mbanwie )

*The Politics of Military Force* - Frank Stengel 2020-12-08

The Politics of Military Force examines the dynamics of discursive change that made participation in military operations possible against the background of German antimilitarist culture. Once considered a strict taboo, so-called out-of-area operations have now become widely considered by German policymakers to be without alternative. The book argues that an understanding of how certain policies are made possible (in this case, military operations abroad and force transformation), one needs to focus on processes of discursive change that result in different

policy options appearing rational, appropriate, feasible, or even self-evident. Drawing on Essex School discourse theory, the book develops a theoretical framework to understand how discursive change works, and elaborates on how discursive change makes once unthinkable policy options not only acceptable but even without alternative. Based on a detailed discourse analysis of more than 25 years of German parliamentary debates, *The Politics of Military Force* provides an explanation for: (1) the emergence of a new hegemonic discourse in German security policy after the end of the Cold War (discursive change), (2) the rearticulation of German antimilitarism in the process (ideational change/norm erosion) and (3) the resulting making-possible of military operations and force transformation (policy change). In doing so, the book also demonstrates the added value of a poststructuralist approach compared to the naive realism and linear conceptions of norm change so prominent in the study of German foreign policy and International Relations more generally.

*Interpreting International Politics* - Cecelia Lynch 2013-12-04

*Interpreting International Politics* addresses each of the major, "traditional" subfields in International Relations: International Law and Organization, International Security, and International Political Economy. But how are interpretivist methods and concerns brought to bear on these topics? In this slim volume Cecelia Lynch focuses on the philosophy of science and conceptual issues that make work in international relations distinctly interpretive. This work both legitimizes and demonstrates the necessity of post- and non-positivist scholarship. Interpretive approaches to the study of international relations span not only the traditional areas of security, international political economy, and international law and organizations, but also emerging and newer areas such as gender, race, religion, secularism, and continuing issues of globalization. By situating, describing, and analyzing major interpretive works in each of these fields, the book draws out the critical research challenges that are posed by and the progress that is made by interpretive work. Furthermore, the book also pushes forward interpretive insights to areas that have entered the IR radar screen more

recently, including race and religion, demonstrating how work in these areas can inform all subfields of the discipline and suggesting paths for future research.

*Designing West Africa* - P. Schwab 2004-07-09

Many African nations are now described as 'fourth world nations', ones which essentially have no future. How could this have happened? Through the scope of the 1960's, the first decade of African independence, Peter Schwab presents a compelling and provocative answer to this question. *Designing West Africa* tells the story of a pivotal decade in African history, when the fate of the continent was decided. Focusing on the six most visible leaders of the period - painting detailed portraits of them both as leaders and as people - Schwab looks at how Africa served as a ground to play out larger international conflicts, namely the Cold War. He does not fall back on blaming non-African involvement for the failure to build a visible leadership for the continent; rather he critiques the African leaders themselves for their individual failings.

*International Responses to Mass Atrocities in Africa* - Kurt Mills 2015-10-16

Since the end of World War II and the founding of the United Nations, genocide, crimes against humanity and other war crimes—mass atrocities—have been explicitly illegal. When such crimes are committed, the international community has an obligation to respond: the human rights of the victims outweigh the sovereignty claims of states that engage in or allow such human rights violations. This obligation has come to be known as the responsibility to protect. Yet, parallel to this responsibility, two other related responsibilities have developed: to prosecute those responsible for the crimes, and to provide humanitarian relief to the victims—what the author calls the responsibility to palliate. Even though this rhetoric of protecting those in need is well used by the international community, its application in practice has been erratic at best. In *International Responses to Mass Atrocities in Africa*, Kurt Mills develops a typology of responses to mass atrocities, investigates the limitations of these responses, and calls for such responses to be

implemented in a more timely and thoughtful manner. Mills considers four cases of international responses to mass atrocities—in Rwanda, the Democratic Republic of the Congo, Uganda, and Darfur—putting the cases into historical context and analyzing them according to the typology, showing how the responses interact. Although all are intended to address human suffering, they are very different types of actions and accomplish different things, over different timescales, on different orders of magnitude, and by very different types of actors. But the critical question is whether they accomplish their objectives in a mutually supportive way—and what the trade-offs in using one or more of these responses may be. By expanding the understanding of international responsibilities, Mills provides critical analysis of the possibilities for the international community to respond to humanitarian crises.

**The United States and the Congo Crisis, 1960 - 1961** - Tim Pfefferle 2012-12-21

Scientific Essay from the year 2012 in the subject Politics - International Politics - Region: Africa, grade: A, University of Miami (Department of International Studies), course: American Imperialism, language: English, abstract: An assessment of the role played by the United States in the so-called Congo Crisis, focusing on the initial stage from 1960 to early 1961. Following a rendering of the historical context, US foreign policy will be analyzed from a three-dimensional perspective. Thus, Realist, Marxist, and Constructivist theories of International Relations are employed to provide an interpretation of the sources and nature of US policy during the Congo Crisis. In conclusion, it will be argued that Constructivism provides the most comprehensive explanatory model to illustrate US foreign policy.

**International Law and the Classification of Conflicts** - Elizabeth Wilmshurst 2012-08-02

International law separates international from non-international conflicts. This book discusses how this categorisation operates, identifying the legal questions raised. Case studies show how this impacts on issues like detention in armed conflict and the relationship between human rights and humanitarian law.

*The Interaction Between Local and International Peacebuilding Actors* - Sara Hellmüller 2017-12-22

This book helps to better understand how the interaction between local and international peacebuilding actors influences the outcomes of their programs. Based on the case study of Ituri in the Democratic Republic of Congo, it analyses the relationships between local and international peacebuilding actors over the long term and assesses ways to overcome the obstacles to more cooperative partnerships. Focusing on perceptions, the book nuances existing definitions of war, peacebuilding and peace and allows for a more comprehensive understanding of conflict contexts. Thereby, it contributes to the literature on peacebuilding effectiveness and makes concrete suggestions for translating these findings into practice.

*Africa's Deadliest Conflict* - Walter C. Soderlund 2013-09-03

*Africa's Deadliest Conflict* deals with the complex intersection of the legacy of post-colonial history—a humanitarian crisis of epic proportions—and changing norms of international intervention associated with the idea of human security and the responsibility to protect (R2P). It attempts to explain why, despite a softening of norms related to the sanctity of state sovereignty, the international community dealt so ineffectively with a brutal conflict in the Democratic Republic of the Congo, which between 1997 and 2011 claimed an estimated 5.5 million. In particular, the book focuses on the role of mass media in creating a will to intervene, a role considered by many to be the key to prodding a reluctant international community to action. Included in the book are a primer on Congolese history, a review of United Nations peacekeeping missions in the Congo, and a detailed examination of both US television news and New York Times coverage of the Congo from 1997 through 2008. Separate conclusions are offered with respect to peacekeeping in the Age of R2P and on the role of mass media in both promoting and inhibiting robust international responses to large-scale humanitarian crises.

*Resounding International Relations* - M.I. Franklin 2016-09-23

This book explores a provocative area of inquiry for critical theory and

research into world politics and popular culture: music. Not just because political science barely engages with anything musical, but also because it is clear that many opportunities for critical scholarship and reflection on global politics and economics are present in the spaces and relationships created by organized sound. It is easy to focus on the textual elements of music, but there is more at stake than just the words. Critical reflection on the intersections between music and politics also need to take into account the visceral and non-verbal elements such as counterpoint and harmony, polyphony and dissonance, noise, rhymes, rhythms, performance and the visual/aural dimensions to music-making.

*Re-imagining International Relations* - Barry Buzan 2021-12-09

Aimed at readers interested in constructing a less West-centric, more global discipline of International Relations, this book provides a concise, thorough introduction to the thought and practice of international relations from premodern India, China and the Islamic world, and how it relates to modern IR.

***Performing Trauma in Central Africa*** - Laura Edmondson 2018-03-26

What are the stakes of cultural production in a time of war? How is artistic expression prone to manipulation by the state and international humanitarian organizations? In the charged political terrain of post-genocide Rwanda, post-civil war Uganda, and recent violence in the Democratic Republic of Congo, Laura Edmondson explores performance through the lens of empire. Instead of celebrating theatre productions as expression of cultural agency and resilience, Edmondson traces their humanitarian imperatives to a place where global narratives of violence take precedence over local traditions and audiences. Working at the intersection of performance and trauma, Edmondson reveals how artists and cultural workers manipulate narratives in the shadow of empire and how empire, in turn, infiltrates creative capacities.

**Civil Militia** - David J. Francis 2017-07-05

This volume critically engages with the phenomenon of civil militias in Africa, especially the nature of threats and challenges they pose to national and human security. It questions why the African political scene is increasingly inundated with the activities of civil militias, examines the socio-political and economic conditions that trigger and/or encourage and sustain the operations of civil militias, and investigates the dominant motivations of African civil militias. In the face of this complex security emergency, the volume conceptualizes and theorizes the phenomenon of civil militias; focuses the academic debate and policy on the links between civil militias and the growing cycle of state failure, instability, collapse and fragmentation in Africa; broadly and critically explores and expounds the short-term security consequences of the operations of civil militias; and articulates a corpus of policy-relevant knowledge. The book is ideally suited to courses on African studies, security and peace studies and military studies but would also be of interest to practitioners.

*Imagining the Congo* - K. Dunn 2003-05-29

Understanding the current civil war in the Congo requires an examination of how the Congo's identity has been imagined over time. Imagining the Congo historicizes and contextualizes the constructions of the Congo's identity in order to analyze the political implications of that identity, looking in detail at four historical periods in which the identity

of the Congo was contested, with numerous forces attempting to produce and attach meanings to its territory and people. Dunn looks specifically at how what he calls 'imaginings' of the Congo have allowed the current state of affairs there to develop, but he also looks at the broader conceptual question of how the concept of identity has developed and become important in recent international relations scholarship.

*Migration and Christian Identity in Congo (DRC)* - Emma Wild-Wood 2008-08-31

*Imagining the Congo* - Kevin C. Dunn 2003-05-30

Understanding the current civil war in Congo requires an examination of how the Congo's identity has been imagined over time. Imagining the Congo historicizes and contextualizes the constructions of the Congo's identity during four historical periods. Kevin Dunn explores "imaginings" of the Congo that have allowed the current state of affairs there to develop, and the broader conceptual question of how identity has become important in recent IR scholarship.

Sexual Violence as a Weapon of War? - Maria Eriksson Baaz 2013-05-09  
All too often in conflict situations, rape is referred to as a 'weapon of war', a term presented as self-explanatory through its implied storyline of gender and warring. In this provocative but much-needed book, Eriksson Baaz and Stern challenge the dominant understandings of sexual violence in conflict and post-conflict settings. Reading with and against feminist analyses of the interconnections between gender, warring, violence and militarization, the authors address many of the thorny issues inherent in the arrival of sexual violence on the global security agenda. Based on original fieldwork in the Democratic Republic of the Congo, as well as research material from other conflict zones, Sexual Violence as a Weapon of War? challenges the recent prominence given to sexual violence, bravely highlighting various problems with isolating sexual violence from other violence in war. A much-anticipated book by two acknowledged experts in the field, on an issue that has become an increasingly important security, legal and gender topic.  
Protestant Missionaries and Humanitarianism in the DRC - Jeremy Rich

2020

A significant contribution to the history of humanitarianism, Christianity and the politics of aid in Africa.

**The Congo Wars** - Doctor Thomas Turner 2010-01-01

Since 1996 war has raged in the Congo while the world has looked away. Waves of armed conflict and atrocities against civilians have resulted in over three million casualties, making this one of the bloodiest yet least understood conflicts of recent times. In The Congo Wars Thomas Turner provides the first in-depth analysis of what happened. The book describes a resource-rich region, suffering from years of deprivation and still profoundly affected by the shockwaves of the Rwandan genocide. Turner looks at successive misguided and self-interested interventions by other African powers, including Uganda, Angola, Zimbabwe and Namibia, as well as the impotence of United Nations troops. Cutting through the historical myths so often used to understand the devastation, Turner indicates the changes required of Congolese leaders, neighbouring African states and the international community to bring about lasting peace and security.

Globalising the Regional, Regionalising the Global: Volume 35, Review of International Studies - Rick Fawn 2009-04-30

A collection of leading international scholars examine the concept of regions from a range of perspectives and assess leading contemporary examples.
