Advanced Materials 1991-1992, I. Source Book focuses on the properties, characteristics, reactions, applications, and composition of ceramics, composites, and plastics. The publication first elaborates on ceramics, including markets, materials, applications, processing, equipment, standards, health, safety, the environment, research initiatives, and industry news. Topics include joint ventures/agreements, powder processing, furnaces, bioceramics, electronics, superconductors, oxide films, silica, sensors, and superconductors. The manuscript also takes a look at composites, as well as markets, materials, applications, processing, non-destructive evaluation, testing, health, safety, and the environment, research initiatives, and industry news. Concerns include restructuring, takeovers and mergers, recycling, health and safety, test development, data generation, manufacturing processes, tooling, coatings, general engineering, aerospace, automotive, and boom in advanced composites. The book then ponders on plastics, including markets, materials, applications, processing, equipment, health, safety, the environment, and industry news. The publication is a valuable reference for readers interested in the properties, applications, processing, and composition of ceramics, composites, and plastics.

International Business - Andrew Delios 2012-12-10

International Business: An Asia Pacific Perspective (Second Edition) provides a unique exploration of the topic of international business. It examines decisions relevant to managers in internationalizing and multinational firms operating in the Asia Pacific region. Its uniqueness stems from the cutting-edge conceptual material that underlies the decision-making frameworks in the text and in the numerous Asian company examples and illustrations. Users of this text examine such essential topics as the measurement and analysis of the cultural, political and economic dimensions of the international environment; the formation of internationalization strategies, including entry mode choice and strategic alliances; the analysis of the competitive implications of multinational firms and business groups; multinational, subsidiary and expatriate management; and the management of ethical issues.

Plunkett's Automobile Industry Almanac 2009 - Jack W. Plunkett 2008

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have

acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce ; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. On a Global Mission: The Automobiles of General Motors International Volume 3 - Louis F. Fourie 2016-12-27

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Driving from Japan - Wanda James 2015-08-13

This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

Modern Marine Internal Combustion Engines - Ievgen Bilousov 2020-06-30

This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas-diesel engines and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine, depicting its main design features. This book offers a unique, self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture/marine engineering with their design projects at both master and graduate levels, thus filling an important gap in the literature.

The Adoption and Diffusion of Imported Technology - J.L. Enos 2018-10-29

This book, first published in 1988, considers the problems that developing countries face when importing technology from abroad. The major issues - technical, economic, political - are analysed in the case of one particular country: Korea. The book describes the negotiations with the foreign companies that controlled the desired technology, the building of the plants, the training of engineers and managers to replace expatriots, the improvements of processes and products and the maintenance of efficient and profitable production. In their research the authors were given access to information usually kept confidential - government memoranda and minutes, company contacts and records, costs and prices. The book also

considers how typical of the developing countries Korea is, and the authors make certain policy recommendations for the future.
