The Dictionary of Biographical Reference - Lawrence Barnett Phillips 2018-03-22

Excerpt from The Dictionary of Biographical Reference: Containing One Hundred Thousand Names, Together With a Classed Index of the Biographical Literature of Europe and America Of works on Biography the number is legion nevertheless, it appeared to the compiler of the present volume that room still existed for a Compendium, in which, by a judicious system of compression, 3. Students' Dictionary might be formed, which would register what, after all, is of the first importance to them, - viz., the more prominent dates and facts, - and at the same time assist them to the knowledge of works of a more recondite nature, in which fuller information might be found, if needed. Such a Compendium is now before the reader. An approximation to the system adopted has been attempted by others, but in no case has it been carried out to the extent of the present work neither has the system of reference - the principal feature of this design ever been essayed, if thought of. The want which the present work is intended to supply is one which must have been experienced by every earnest reader or writer. The value of the data upon which the 'generalisations of both must rest mainly depends upon the readiness with which they can be verified, and no facts are more frequently in requisition for this purpose than those connected with the personal history of individuals; and when these are not of such note as to have taken their place in general history, it will be evident to all that much valuable time is frequently wasted in the attempt to identify them. Creativity & Innovation - Ashwini Kumar Singh 2021-03-17

"Creativity and innovation are to events, what the heart and soul are to the living." The book aims at encouraging readers to capture the traits and develop skills for enhancing their creative and innovative capabilities, cultivating the culture of creativity and innovation. Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services. Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees' creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.

The Death and Life of Great American Cities - Jane Jacobs 2016-07-20

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

Insurance - How it Started - Raymond McMillan 2021-04-18

The idea of writing this book was to capture the humble origin of insurance from a casual chat in a coffee house (not in a court or parliament), then the various case laws which cemented the fundamental principles for example - Life Assurance Act 1774, cemented the principle of Insurable interest as necessary in EVERY contract of Insurance. We continue to observe its evolution through the years to today's position where Insurance is a regulated industry and recent ACTs in 2012 and 2015, now shifts the responsibility to request material facts concerning risks to the Insurers and away from the requirement under the Marine Insurance Act 1906 which was the standing position for over 100 years until the 2012 & 2015 Acts. Finally, we cannot ignore the advent of the Information Technology age where policies are sold and bound in minutes over the internet or via call centers as well as claims payment being concluded over a telephone and monies being transferred directly into clients bank accounts without any face to face meeting with the insurer. We also cannot ignore the new distribution channels where supermarkets and banks now sell insurance. Can you imagine the industry in say 5 years' time?
