The Story of Noah's Ark - Helen Dardik 2017-06-06

A long time ago, the people of the world were not treating each other kindly. God was very sad, and so he decided to send a flood to cover the entire world. However, one man, Noah, and his family were very good people, so God told Noah to build a big boat and to gather two of every kind of animal to be kept safe in the boat when the floor arrived.

Noah did as God commanded and soon he, his family, and all the animals were drifting in the flood waters. After many weeks of waiting, the flood went away and Noah, his family, and the animals were able to again return to land. God set a rainbow in the sky, promising Noah that he would never again flood the earth. Share this remarkable and classic Bible story with young ones with this delightful new picture

Outside the Box - Tim Lovett

So He destroyed all living things which were on the face of the ground: both man and cattle, creeping thing and bird of the air. They were destroyed from the earth. Only Noah and those who were with him in the ark remained alive. Genesis 7:22-24 Could a ship be constructed that would be able to survive the global flood described in biblical book of Genesis? Could it be built without the modern techniques of today being available to Noah? This groundbreaking book answers both of these questions with a resounding "yes"! Join naval expert and mechanical engineer Tim Lovett in "thinking outside the box" as you consider groundbreaking research in this innovative new study on Noah's ark. Lovett builds on traditional research into this historic event using the latest techniques in computer modeling and testing. Includes insight and context by pioneering creationist researcher, Dr. John Whitcomb.

Unveils a new ark design based on biblical information and shipbuilding principles Beautiful illustrations and photos reveal facets of design and construction techniques Remaining faithful to the biblical dimensions, Lovett's updated design, similar to that of ancient sailing vessels, is based on established principles in ship design and cutting-edge research. He reveals a feasible ark design, explores the impact of flood waters on the vessel, and provides remarkable insight and analysis into the skills and techniques needed to construct it.

Noah's Ark - Hubert Damisch
2016-02-12

From Noah's Ark to Diller + Scofidio's "Blur" Building, a distinguished art historian maps new ways to think about architecture's origin and development. Trained as an art historian but viewing architecture from the perspective of a "displaced philosopher," Hubert Damisch in these essays offers a meticulous parsing of language and structure to "think architecture in a different key," as Anthony Vidler puts it in his introduction. Drawn to architecture because it provides "an open series of structural models," Damisch examines the origin of architecture and then its structural development from the nineteenth through the twenty-first centuries. He leads the reader from Jean-François

Blondel to Eugène Viollet-le-Duc to Mies van der Rohe to Diller + Scofidio, with stops along the way at the Temple of Jerusalem, Vitruvius's *De Architectura*, and the Louvre. In the title essay, Damisch moves easily from Diderot's *Encyclopédie* to Noah's Ark (discussing the provisioning, access, floor plan) to the Pan American Building to Le Corbusier to Ground Zero. Noah's Ark marks the origin of construction, and thus of architecture itself. Diderot's *Encyclopédie* entry on architecture followed his entry on Noah's Ark; architecture could only find its way after the Flood. In these thirteen essays, written over a span of forty years, Damisch takes on other histories and theories of architecture to trace a unique trajectory of architectural structure and thought. The essays are, as Vidler says, "a set of exercises" in thinking about architecture.
