Crowdsourcing and Online Collaborative Translations - Miguel A. Jiménez-Crespo 2017-04-11

Crowdsourcing and online collaborative translations have emerged in the last decade to the forefront of Translation Studies as one of the most dynamic and unpredictable phenomena that has attracted a growing number of researchers. The popularity of this set of varied translational processes holds the potential to reframe existing translation theories, redefine a number of tenets in the discipline, advance research in the so-called "technological turn" and impact public perceptions on translation. This book provides an interdisciplinary analysis of these phenomena from a descriptive and critical perspective, delving into industry approaches and fostering inter and intra disciplinary connections between areas in which the impact is the greatest, such as cognitive translology, translation technologies, quality and translation evaluation, sociological approaches, text-linguistic approaches, audiovisual translation or translation pedagogy. This book is of special interest to translation researchers, translation students, industry experts or anyone with an interest on how crowdsourcing and online collaborative translations relate to past, present and future research and theorizations in Translation Studies.

Model Rules of Professional Conduct - American Bar Association. House of Delegates 2007

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. Online Application System - Its Weaknesses and Their Possible Solutions - Alikira Richard 2012

Bachelor Thesis from the year 2010 in the subject Computer Science - Miscellaneous, printed single-sided, grade: B, Kampala International University - Dar-es-salaam College (faculty of computer studies), course: information technology, language: English, comment: This piece of work was as a result of joint efforts of Alikira Richard, JAMES MWIKWABE NYAMAHANGA and EMMANUEL CHARLES DOBSON. James and Charles were very very cooperative as we trailed our journey from the start to the end. Alikira Richard guided the two students till the end. This same project was submitted as a graduation project for the two students [James and Charles] We hope you find this work usefull, abstract: For many years students have been applying to colleges manually. The manual Application system has made the process difficult, leading to some of the students giving up and others applying late. The ineffectiveness of the manual Application system pushed the researchers to conduct this study so as to identify the weaknesses of manual students' Application system, identify possible solutions to the identified weaknesses. The study was carried out in Tanzania, and data was collected from four regions of Tanzania namely Dar es Salaam, Morogoro, Dodoma and Iringa. During data collection, several college students, secondary school students, registrars and parents were interviewed. It was found out that, the manual system wastes a lot of time especially when students are many. Other weaknesses included; lack of consistence, difficult in data retrieval among others. And an online Application system was seen as the only solution to the perceived problem. PHP and MySQL were used to develop an online Application system. The system can be accessed via the web by simply typing the address of the system server in the web browser. The major limitation of the study is that most villages have no access to the internet besides most people not being computer literate. Therefore the researcher recommends that

Software Project Management - S. Ramanathan 2016-05-03

Software development has turned truly global - with requirement gathering and design at one location and program development at another. Cost advantage has moved more and more of the software life cycle activities to the developing nations like India and the Philippines. While outsourcing, many companies in the US and other Western countries find project management an area that needs improvement in the emerging service provider nations. Processes and teams across different geographical locations make the management all the more challenging. It is precisely this need that this book intends to address. The author has extensive management experience in IT projects in the manufacturing, banking and telecom domains and distills that experience to narrate the project management knowledge areas with real life examples and case studies. Many books and articles have described the challenges faced by the US project manager in dealing with a contractor in another country, but the remedial measures for this skill gap needs to emerge within the cultural context of the service provider nations. This book addresses this challenge primarily from an Indian perspective, which can be extended to many other developing nations. Billions of dollars of US and European projects are now being handled in India and other developing countries and thousands of project managers have to emerge from the talent pools of these countries to efficiently manage this investment. It is with an intent to develop these skills this book has been written.

The Pig Book - Citizens Against Government Waste 2013-09-17

The federal government wastes your tax dollars worse than a drunken sailor on shore leave. The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years the likes of: - \$50 million for an indoor rain forest in Iowa - \$102 million to study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, *The Pig Book* proves one thing about

Capitol Hill: pork is king!

Managing Healthcare Information Systems with Web-Enabled Technologies - Eder, Lauren B. 1999-07-01

Healthcare organizations are undergoing major reorganizations and adjustments to meet the increasing demands of improved healthcare access and quality, as well as lowered costs. As the use of information technology to process medical data increases, much of the critical information necessary to meet these challenges is being stored in digital format. Web-enabled information technologies can provide the means for greater access and more effective integration of healthcare information from disparate computer applications and other information resources. *Managing Healthcare Information Systems with Web-Enabled Technologies* presents studies from leading researchers and practitioners focusing on the current challenges, directions, trends and opportunities associated with healthcare organizations and their strategic use of Web-enabled technologies.

Software and Organisations - Neil Pollock 2008-08-14

This is the first book that addresses the genesis and career of the modern day enterprise system in a comprehensive and robust manner. It does so through setting out a new approach for the study of packaged solutions and presents novel empirical studies based on in-depth ethnographic and longitudinal research conducted within supplier organisations and other relevant sites. The authors shift the debate within the social study of information systems, from one that is primarily focused on 'implementation studies', to one that follows software as it evolves, matures and crosses organisational boundaries. Through tracing and comparing the 'biography' of a number of software systems the authors develop a new vocabulary for the dynamics that surround standardised software. Original in its approach, this book draws on a number of ethnographic studies in supplier organisations, user settings, user forums, and applies theories from the Sociology of Technology, Technology Studies, Innovation Studies, and beyond. As such it will be of interest across all of these subject areas and to researchers from the wider fields of Information Systems and Business Studies.

Flagship Universities in Africa - Damtew Teferra 2017-06-26

This book advances an in-depth, comprehensive analysis of flagship universities in Africa - the largest, most selective, and most prestigious universities on the continent. The book draws on a range of country-specific case-studies, including Botswana, Egypt, Ethiopia, Ghana, Kenya, Mauritius, Nigeria, Senegal, Tanzania and Zambia, to explore a range of issues associated with flagship universities and their role in higher education in Africa. Newly-established institutions in new nation states, and states emerging from conflict, often rely on these flagship universities to train their academics, and build their intelligentsia; flagship universities are thus capacity-builders and trend-setters in their respective countries and sub-regions. This volume brings together a

range of scholars to celebrate the impact, influence and contributions of African universities, not only within Africa, but across the globe. The book will be of great significance to students and researchers in the field of education, particularly those with an interest in sociology and politics of higher education.

Technology for Efficient Learner Support Services in Distance Education - Anjana 2018-09-26

This book explores the ways in which technology is being used by various open universities in developing countries to extend learner support services to distance learners. It shares the best practices being followed by different open universities so that these may be replicated by other universities. It provides an overview of the use of various digital technologies, e-learning tools, eLearning platforms, virtual learning environments, and synchronous and asynchronous technologies in open and distance learning (ODL) systems. Moreover, it discusses the importance of ODL systems in providing inclusive education in developing countries through the use of ICT with a special focus on adult, rural and elderly learners, as well as the role of technology in science education through ODL system. A transformative model of sustainable collaborative learning is presented, integrating concepts based on theoretical frameworks to increase the flexibility and solve existing issues in developing countries, which may be used for policy changes in distance learning. It concludes by examining various challenges in successfully implementing technology for effective delivery of learner support services in distance education systems in developing countries and exploring the strategies required to overcome these challenges.

India 2050 - Ramgopal Agarwala 2014-10-31

Can India achieve a high-income status by 2050 when it celebrates the centenary of its Republic? Will the nation eliminate absolute poverty and improve its human development record? This book emphasizes the centrality of a trade-oriented services sector led by communication, business services, health, education, research, and innovations for achieving these growth targets. It also argues that inclusiveness, financial prudence, and low-carbon lifestyles are preconditions to long-term growth. India can achieve such prosperity neither through the socialistic policies of 1950-80 nor through the neo-liberalistic policies since 1980. It needs to, instead, follow a middle-path approach closer to the systems adopted by Germany and the Nordic countries. It is within

this framework that India will devise its independent development paradigm rooted in its own traditions and realities.

Learning and Knowledge Analytics in Open Education - Feng-Qi Lai

Research Anthology on Remote Teaching and Learning and the Future of Online Education - Management Association, Information Resources
2022-09-02

The sudden implementation of emergency health procedures at the start of the COVID-19 pandemic forced many educators and educational institutions to explore new territory in terms of policy, teaching strategy, and more. Now that many institutions are familiar with online education, innovations have been developed and implemented. It is essential to study these best practices and innovations that have been developed in remote teaching and learning to better understand the future of online education. The *Research Anthology on Remote Teaching and Learning and the Future of Online Education* explores the recent developments, strategies, and innovations in remote teaching and learning that have been implemented globally. Covering topics such as emergency remote teaching, psycho-social well-being, and cross-cultural communication, this major reference work is an indispensable resource for educators and

administrators of both K-12 and higher education, pre-service teachers, teacher educators, librarians, government officials, IT managers, researchers, and academicians.

Instructional Design: Concepts, Methodologies, Tools and Applications - Management Association, Information Resources 2011-03-31

This three-volume work covers all fundamental strategies and theories and encourages continued research in strengthening the consistent design and reliable results of educational programs and models.

Systems Analysis and Design - Alan Dennis 2015-03-02

Systems Analysis and Design: An Object-Oriented Approach with UML, 5th Edition by Dennis, Wixom, and Tegarden captures the dynamic aspects of the field by keeping students focused on doing SAD while presenting the core set of skills that every systems analyst needs to know today and in the future. The text enables students to do SAD—not just read about it, but understand the issues so they can actually analyze and design systems. The text introduces each major technique, explains what it is, explains how to do it, presents an example, and provides opportunities for students to practice before they do it for real in a project. After reading each chapter, the student will be able to perform that step in the system development process.

Governance in South Asia - Rumki Basu 2016-11-03

This book presents a nuanced analysis of governance in South Asia. It examines a range of themes including civil service reforms, women and development, environmental governance and public sector programmes, together with the impact of globalization on local issues and its influence on governance in the region. Through grass-roots studies, the volume also traces how the last 20 years have seen a social and economic resurgence in South Asia - transiting from stages of poverty, low growth rates, illiteracy and poor health to flourishing economies, improved savings, greater investments and stronger human development indicators. Drawing on extensive fieldwork, this book will be of great interest to scholars of politics and public administration, development studies, labour studies, and sociology and social anthropology. It will also be useful to practitioners in the field, NGOs and civil servants.
