Geospatial Information Technology for Emergency Response

- Sisi Zlatanova
2008-01-24

Disaster management is generally understood to consist of four phases: mitigation, preparedness, response and recovery. While these phases are all important and interrelated, response and recovery are often considered to be the most critical in terms of saving lives. Response is the acute phase occurring after the event, and includes all arrangements

The Modern Language of Architecture

- Bruno Zevi
1994

Frank Lloyd Wright called Bruno Zevi "the most penetrating architectural critic of our time," and one could ask for no better proof than Zevi's masterpiece, *The Modern Language of Architecture*. In it, Zevi sets forth seven principles, or "antirules," to codify the new language of architecture created by Le Corbusier, Gropius, Mies van der Rohe, and Wright. In place of the classical language of the

Beaux Art school, with its focus on abstract principles of order, proportion, and symmetry, he presents an alternative system of communication characterized by a free interpretation of contents and function, an emphasis on difference and dissonance, a dynamic of multidimensional vision, and independent interplay of elements, an organic marriage of engineering and design, a concept of living spaces that are designed for use, and an integration of buildings into their surroundings. Anticipating the innovations of postmodern architecture, Zevi argues forcefully for complexity and against unity, for decomposition dialogue between architecture and historiography, finding elements of the modern language of architecture throughout history, and discussing the process of architectural innovation. Sumptuously illustrated, and written in a clear, accessible manner, *The Modern Language of Architecture* will long

remain one of the classics of architectural criticism and history.

The Non-Euclidean Revolution - Richard J. Trudeau 2008-01-21

Richard Trudeau confronts the fundamental question of truth and its representation through mathematical models in *The Non-Euclidean Revolution*. First, the author analyzes geometry in its historical and philosophical setting; second, he examines a revolution every bit as significant as the Copernican revolution in astronomy and the Darwinian revolution in biology; third, on the most speculative level, he questions the possibility of absolute knowledge of the world. A portion of the book won the Pólya Prize, a distinguished award from the Mathematical Association of America.

Digital Scholarly Editing - Elena Pierazzo 2016-03-16

This book provides an up-to-date, coherent and comprehensive treatment of digital scholarly editing, organized according to the typical timeline and workflow of the preparation of an edition: from the choice of the object to edit, the editorial work, post-production and publication, the use of the published edition, to long-term issues and the ultimate significance of the published work. The author also examines from a theoretical and methodological point of view the issues and problems that emerge during these stages with the application of computational techniques and methods. Building on previous

publications on the topic, the book discusses the most significant developments in digital textual scholarship, claiming that the alterations in traditional editorial practices necessitated by the use of computers impose radical changes in the way we think and manage texts, documents, editions and the public. It is of interest not only to scholarly editors, but to all involved in publishing and readership in a digital environment in the humanities.

BE RICH AND HAPPY. - ROBERT T. KIYOSAKI 2019

Product-Led Growth - Wes Bush 2019-05

Can your software sell itself? Convention and the trillion-dollar sales industry claim that it's impossible for your product to sell itself. Yet successful software businesses like Slack, Dropbox, Atlassian, and

HubSpot make millions selling to customers who never once reached out to a sales rep. In *Product-Led Growth: How to Build a Product That Sells Itself*, growth consultant Wes Bush challenges the traditional SaaS marketing and sales playbook and introduces a completely new way to sell products. Bush reveals how your product--not expensive sales teams--can be the main vehicle to acquire, convert, and retain customers. In this step-by-step guide to Product-Led Growth, Bush explains: Why you should flip the traditional sales process on its head and turn your product into a sales machine; How to decide whether your business should use a free trial, freemium, or hybrid model; How to turn free users into happy, paying customers. History tells us that "how" you sell is just as important as "what" you sell. Blockbuster couldn't compete with Netflix by selling the same digital content, and you need to decide "when" not "if" you'll innovate on the way you sell. Are you going to be product-

led? Or will you be disrupted, too?

Trust and School Life - Dimitri Van Maele 2014-01-31

This book samples recent and emerging trust research in education including an array of conceptual approaches, measurement innovations, and explored determinants and outcomes of trust. The collection of pathways explores the phenomenon of trust and establishes the significance of trust relationships in school life. It emboldens the claim that trust merits continued attention of both scholars and practitioners because of the role it plays in the production of equity and excellence. Divided into four parts, the book explores trust under the rubrics of learning, teaching, leading and bridging. The book proposes a variety of directions for future research. These include the simultaneous investigation of trust from the perspectives of various trusters, and at both the individual and group levels, longitudinal research designs, and an elaboration of methods.

Honeyball & Bowers'
Textbook on Employment

Law - Simon Honeyball 2016
Honeyball and Bowers' Textbook on Employment Law is an approach to employment law with strong critical analysis whilst placing it in its wider contexts, in a concise and user-friendly format. Fully updated to take into account the recent significant developments in this area, including the Equality Act 2010, the key topics on most employment law courses are addressed in detail. An extremely clear writing style allows this text to remain accessible and student-focussed, while providing detailed explanations and analysis of the law. The text also includes diagrams and chapter summaries throughout to aid student understanding, while further reading suggestions assist with essay preparation and research. Setting employment law in context, this book considers

both industrial and collective issues as well as examining the increasing role of the EU in UK employment law. A separate chapter on human rights also enables students to understand the role human rights legislation plays in the development of employment law. This book also contains cross referencing to Painter & Holmes' Cases & Materials on Employment Law, ensuring that these two texts continue to complement one another and provide the perfect combination of textbook analysis and the most up-to-date cases and materials. This text is accompanied by a free Online Resource Centre (www.oxfordtextbooks.co.uk/orc/honeyball12e/) which contains updates to the law and useful weblinks.

UNESCO - Miyako Ali 2018
UNESCO: Current Issues and Challenges opens by examining the Convention on the Diversity of Cultural Expressions approved by UNESCO in 2005, which was intended to be the reference document for cultural diversity, but did not

contemplate biological diversity. The concept of biological diversity is solidly formed while the concept of cultural diversity is barely systematized. Since its foundation in 1945, UNESCO has always advocated that education, science and culture are the paths for peace, which must be built upon respect for human rights. Therefore, the following chapter examines the UNESCO educational vision following the life cycle of a policy discussed in Jallade, Radi & Cuenin (2001), together with its mission of intellectual leadership, specialised knowledge, alliances, fair mediation and advanced monitoring. The policies necessary to make the aforementioned possible are also discussed. Following this, a digital project to improve the access to the UNESCO World Heritage Site of Mount Etna is presented. It proposes an interactive and multimedia catalog made with Google Street View technologies. The catalog can be browsable on a 360° virtual tour, "augmented"

by specific aerial tours, captions with descriptive sheets and videos and enjoyable also in AR mode. The research presented in the final chapter estimates the net present value of a UNESCO World Heritage designation for three WH sites in Nova Scotia(NS), Canada. The research employs a cost-benefit analysis where economic benefits are defined as tourism related spending associated with the designation, and the costs include the application and ongoing expenses of the designation. It is concluded that the net present value of designation exhibits a high degree of heterogeneity among the sites considered.

The first edition of this book was published in Italian in 1989, about two years after the death of Ludovico Quaroni; this edition in English is addressed mainly to non-Italian scholars with an interest in modern architecture in Italy. Given the imperfect parallel between musical and literary composition, therefore, in this book an intimate intellectual atmosphere prevails, which reveals the author's skill in creating a narrative and also in engaging in a type of critical writing that is rarely undertaken by architect-intellectuals. The five episodes in the book cover almost thirty years, from 1958 to 1987, which were years that remained deeply preserved in the author's memory. The literary form of the pieces gives all of them a common

structure: they are dialogues; usually consisting of brief exchanges of few words, spoken or written, between the author (Lucio Barbera) and Quaroni. In one of them - Charisma - the dialogue takes place between Quaroni and a larger chorus. In another - Elective Misunderstanding - we have a double dialogue at a distance, a trio, if we return to the musical metaphor, between Quaroni, Lodovico Barbiano di Belgiojoso and Barbera. The last piece is a longer conversation by Quaroni on himself; a taking stock and a valediction. On the frontispiece, Barbera gives a clear indication of his intentions: "For students of Architecture who are well-educated and for architects interested in getting to know better a Master of their trade". *The Design Encyclopedia* - Mel Byers 2004

The Design Encyclopedia is a compendium of the world of modern design over the last century and a half. Compiled from a number of primary and secondary sources by the

American author and design historian Mel Byers, in consultation with an international team of design experts, this illustrated design reference guide provides the essential framework for a field that continues to generate intense interest worldwide. In this volume are all the essential facts pertaining to modern design: furniture and product design, graphic design, objects designed by architects, and the various styles and schools of design of the late nineteenth, twentieth, and early twenty-first centuries. With 832 pages and more than 700 full-color illustrations presenting the last 130 years in the history of the design of furniture, lighting, fabrics, ceramics, glassware, metalware, objects in a range of other materials, and mechanical, electrical, and electronic appliances, as well as automobiles and some inventions, this essential reference supplants Mr. Byers's earlier overview of the history of design, published in 1994. It is, however, not merely larger than its

predecessor but more comprehensive, easier to navigate, and keenly focused. Here design is considered in terms of its concrete application to functional objects, relating it to craft, decorative arts, and industrial design but distinguishing it from fine art and theory. There are separate entries for designers and craftspeople, design studios, consortiums and partnerships, noteworthy manufacturers, significant historical periods and styles, and materials. The various discrete entries are organized alphabetically, and are cross-referenced where applicable. Most of the full-color illustrations are drawn from the world-renowned design collection of The Museum of Modern Art; the remainder are drawn from the Quittenbaum Kunstauktionen in Munich and Hamburg. This invaluable publication is the one essential guide for the design professional, the student, and the interested observer of design in our time.

Heritage Building Information Modelling - Yusuf Arayici
2017-02-10

Building Information Modelling (BIM) is being debated, tested and implemented wherever you look across the built environment sector. This book is about Heritage Building Information Modelling (HBIM), which necessarily differs from the commonplace applications of BIM to new construction. Where BIM is being used, the focus is still very much on design and construction. However, its use as an operational and management tool for existing buildings, particularly heritage buildings, is lagging behind. The first of its kind, this book aims to clearly define the scope for HBIM and present cutting-edge research findings alongside international case studies,

before outlining challenges for the future of HBIM research and practice. After an extensive introduction to HBIM, the core themes of the book are arranged into four parts: Restoration philosophies in practice Data capture and visualisation for maintenance and repair Building performance Stakeholder engagement This book will be a key reference for built environment practitioners, researchers, academics and students engaged in BIM, HBIM, building energy modelling, building surveying, facilities management and heritage conservation more widely.

The Brill Dictionary of Ancient Greek - Franco Montanari 2015-05

"The Brill Dictionary of Ancient Greek" is also available online and as a two-volume boxed set.

"The Brill Dictionary of Ancient Greek" is the English translation of Franco Montanari's "Vocabolario della Lingua Greca." With an established reputation as the most important modern dictionary for Ancient Greek, it brings together 140,000 headwords taken from the literature, papyri, inscriptions and other sources of the archaic period up to the 6th Century CE, and occasionally beyond. "The Brill Dictionary of Ancient Greek" is an invaluable companion for the study of Classics and Ancient Greek, for beginning students and advanced scholars alike. Translated and edited under the auspices of The Center for Hellenic Studies in Washington, DC, "The Brill Dictionary of Ancient Greek" is based on the completely revised 3rd Italian edition published in 2013 by Loescher Editore, Torino. Features The principal parts of some 15,000 verbs are listed directly following the entry and its etymology. For each of these forms, the occurrence in the

ancient texts has been certified. When found only once, the location is cited. Nearly all entries include citations from the texts with careful mention of the source. The dictionary is especially rich in personal names re-checked against the sources for the 3rd Italian edition, and in scientific terms, which have been categorized according to discipline. Each entry has a clear structure and typography making it easy to navigate. "For a number of years now, scholars at ease in Italian have benefitted enormously from the riches, layout, concision, and accuracy of Professor Montanari's "Vocabolario della

Lingua Greca," with its added advantage of the inclusion of names. Hence classicists in general will welcome the English version of this very valuable resource."
