All Because You Matter (Digital Read Along) - Tami Charles 2020-10-06

A lyrical, heart-lifting love letter to black and brown children everywhere: reminding them how much they matter, that they have always mattered, and they always will, from powerhouse rising star author Tami Charles and esteemed, award-winning illustrator Bryan Collier.

Discover this poignant, timely, and emotionally stirring picture book, an ode to black and brown children everywhere that is full of hope, assurance, and love. Tami Charles pens a poetic, lyrical text that is part love letter, part anthem, assuring readers that they always have, and always will, matter. This powerful, rhythmic lullaby reassures readers that their matter and

their worth is never diminished, no matter the circumstance: through the joy and wonder of their first steps and first laughs, through the hardship of adolescent struggles, and the pain and heartbreak of current events, they always have, and always will, matter. Accompanied by illustrations by renowned artist Bryan Collier, a four-time Caldecott Honor recipient and a nine-time Coretta Scott King Award winner or honoree, *All Because You Matter* empowers readers with pride, joy, and comfort, reminding them of their roots and strengthening them for the days to come. Lyrical, personal, and full of love, *All Because You Matter* is for the picture book audience what *The Hate U Give* was for YA and *Ghost Boys* was for middle grade: a conversation starter, a community touchstone, and a deep affirmation of worth for the young readers who need it most. This digital read along edition features a recording of the text narrated by the author.

Hands Down, Speak Out - Kassia Omohundro Wedekind 2020

"Hands Down, Speak Out is an innovative book that looks at how we can teach students how to talk and listen to one another, without all discourse running through the teacher. Kassia is a math coach and Christy is a literacy coach. Together, they show how to teach dialogue "micro-lessons" alongside content, both within and across math and literacy, so students become increasingly skilled and independent in conversations. Their hope is that students will have better, deeper discourse within the content areas, and also beyond the classroom"--

We Want to Do More Than Survive - Bettina L. Love
2019-02-19

Winner of the 2020 Society of Professors of Education Outstanding Book Award
Drawing on personal stories, research, and historical events, an esteemed educator offers a vision of educational justice inspired by the rebellious spirit and methods of abolitionists. Drawing on her life's work of teaching and researching in urban schools, Bettina Love persuasively argues that educators must teach students about racial violence, oppression, and how to make sustainable change in their communities through radical

civic initiatives and movements. She argues that the US educational system is maintained by and profits from the suffering of children of color. Instead of trying to repair a flawed system, educational reformers offer survival tactics in the forms of test-taking skills, acronyms, grit labs, and character education, which Love calls the educational survival complex. To dismantle the educational survival complex and to achieve educational freedom—not merely reform—teachers, parents, and community leaders must approach education with the imagination, determination, boldness, and urgency of an abolitionist. Following in the tradition of activists like Ella Baker, Bayard Rustin, and Fannie Lou Hamer, *We Want to Do More Than Survive* introduces an alternative to traditional modes of educational reform and expands our ideas of civic engagement and intersectional justice.

Teaching Engineering, Second Edition - Phillip C. Wankat
2015-01-15

The majority of professors have never had a formal course in education, and the most common method for learning how to teach is on-the-job training. This represents a challenge for disciplines with ever more complex subject matter, and a lost opportunity when new active learning approaches to education are yielding dramatic improvements in student learning and retention. This book aims to cover all aspects of teaching engineering and other technical subjects. It presents both practical matters

and educational theories in a format useful for both new and experienced teachers. It is organized to start with specific, practical teaching applications and then leads to psychological and educational theories. The "practical orientation" section explains how to develop objectives and then use them to enhance student learning, and the "theoretical orientation" section discusses the theoretical basis for learning/teaching and its impact on students. Written mainly for PhD students and professors in all areas of engineering, the book may be used as a text for graduate-level classes and professional workshops or by professionals who wish to read it on their own. Although the focus is engineering education, most of this book will be useful to teachers in other disciplines. Teaching is a complex human activity, so it is impossible to develop a formula that guarantees it will be excellent. However, the methods in this book will help all professors become good teachers while

spending less time preparing for the classroom. This is a new edition of the well-received volume published by McGraw-Hill in 1993. It includes an entirely revised section on the Accreditation Board for Engineering and Technology (ABET) and new sections on the characteristics of great teachers, different active learning methods, the application of technology in the classroom (from clickers to intelligent tutorial systems), and how people learn.

Extending Children's Mathematics - Susan B. Empson 2011

"With the collaboration of a number of dedicated teachers and their students, Susan Empson and Linda Levi have produced a volume that is faithful to the basic principles of CGI while at the same time covering new ground with insight and innovation." - Thomas P. Carpenter This highly anticipated follow-up volume to the landmark *Children's Mathematics: Cognitively Guided Instruction* addresses the urgent need to help teachers understand and

teach fraction concepts.

Fractions remain one of the key stumbling blocks in math education, and here Empson and Levi lay a foundation for understanding fractions and decimals in ways that build conceptual learning. They show how the same kinds of intuitive knowledge and sense making that provides the basis for children's learning of whole number arithmetic can be extended to fractions and decimals. Just as they did in *Children's Mathematics and Thinking Mathematically*, Empson and Levi provide important insights into children's thinking and alternative approaches to solving problems. Three themes appear throughout the book: building meaning for fractions and decimals through discussing and solving word problems the progression of children's strategies for solving fraction word problems and equations from direct modeling through relational thinking designing instruction that capitalizes on students' relational thinking strategies to

integrate algebra into teaching and learning fractions. With illuminating examples of student work, classroom vignettes, "Teacher Commentaries" from the field, sample problems and instructional guides provided in each chapter, you'll have all the tools you need to teach fractions and decimals with understanding and confidence. *Speakout* - J. J. Wilson 2012 'Speakout' is a 6-level general English course for adults that

builds confidence in speaking, listening, reading and writing, enabling students to learn authentic English and bridge the gap between the classroom and the real world.
