[The Little Book of Woodland Bird Songs](#) - Andrea Pinnington 2018-09-25

Hear the songs and learn about 12 of North America's woodland birds. Being able to identify a bird's song is a skill that brings joy and fosters an appreciation of nature. Some bird songs are distinctive and easily recognized, like the common loon and wild turkey. Hawks as a group are distinctive but the individual species vary, as do the owls. Picking up the songs of a Black-capped Chickadee and a White-breasted Nuthatch, however, is not easy. That is where this enchanting book comes into its own. The Little Book of Woodland Bird Songs features recordings of twelve bird songs from some of the best-known woodland species seen and heard in North America. It is an interactive board book that is ideal for curious young readers. The sturdy pages are easy to turn and the twelve song buttons, each with a portrait of the bird, are easy to activate. The high-quality sound module is encased in durable plastic and the one-inch (3-cm) speaker makes it easy to hear and differentiate the elements of the bird's song, such as pitch, tempo and trills. Beautiful lifelike illustrations aid in identifying the birds and a descriptive paragraph and facts panel provide information such as the time of day the bird is likely to sing, what it eats, behavior traits and how it constructs its nest. All twelve birds have winter or summer ranges in the United States or Canada. This means that readers are sure to see most if not all the birds in at least one season over the year. Red Crossbill Sharp-shinned Hawk Hermit Thrush Blue-gray Gnatcatcher Black-capped Chickadee Purple Finch Common Loon Barred Owl Red-eyed Vireo Wild Turkey White-breasted Nuthatch Downy Woodpecker. Birds can be hard to spot at the best of times and never more so than in the woods. Once you learn to recognize these bird sounds, a walk through the forest will never be the same. This partner to The Little Book of Backyard Bird Songs is sure to become another family favorite.

Picaflor - Matthew Pallamary 2021-11-12
Picaflor is the sequel to the Spirit Matters, an award winning memoir that won first place in the San Diego Book Awards Spiritual Book Category, and was an Award-Winning Finalist in the autobiography/memoir category of the National Best Book Awards. This continuation chronicles the two decades since of Matthew (Mateo) J. Pallamary's adventures throughout the mountains, deserts, and jungles of North, Central, and South America pursuing his studies of shamanism and visionary experience working with plant medicines and shamanic plant diets, among them Ayahuasca, Peyote, San Pedro cactus and many more. Picaflor picks up where Spirit Matters left off and is a road map of Mateo's life and death struggles in his lifelong search for truth, personal healing, and transformation, and further explores how Spirit

touches us in every moment of our existence and how most of us are caught up in the dramas that we have created in our lives, blinding us to a reality far greater than anything we can imagine with our rational minds and how this is all simply a matter of awareness. We often feel lost and abandoned in a cold and uncaring world, but in truth we live in an illusion of our own self-created exile, away from the Source of our being which has never stopped loving us -- unconditionally. The time has come now more than ever to awaken and pass through the darkness of our fear induced slumber to embrace the light of truth and find our way back to the infinite light of love that comes to us from the Source of all creation. Awareness through mindfulness is presence, which means being fully present, in the present, right here, right now, in this moment, standing in the light of truth, which is the greatest present anyone can receive in the form of inner peace and nonattachment.

Talking directly to the reader, a bee reveals how flowers are so much stranger than what we think. Did you know that there are some flowers that only bloom in the nighttime? Some flowers are spooky, and look like ghosts, or bats, or a monster's mouth. And while most flowers smell good, there are some that smell like dead meat, or even horse poop! This hilarious and refreshing book with silly and sweet illustrations explores the science of flowers and shows that these plants are not always stereotypically pretty and harmless as we often think they are -- they are fascinating, disgusting, complicated and amazing.

A Walk in the Woods - Bill Bryson 2012-05-15
God only knows what possessed Bill Bryson, a

reluctant adventurer if ever there was one, to undertake a gruelling hike along the world's longest continuous footpath—The Appalachian Trail. The 2,000-plus-mile trail winds through 14 states, stretching along the east coast of the United States, from Georgia to Maine. It snakes through some of the wildest and most spectacular landscapes in North America, as well as through some of its most poverty-stricken and primitive backwoods areas. With his offbeat sensibility, his eye for the absurd, and his laugh-out-loud sense of humour, Bryson recounts his confrontations with nature at its most uncompromising over his five-month journey. An instant classic, riotously funny, *A Walk in the Woods* will add a whole new audience to the legions of Bill Bryson fans.
[The Flying Machine Book](#) - Bobby Mercer

Better still, each of these rockets, gliders, boomerangs, launchers, and helicopters are constructed for little or no cost using recycled materials. *The Flying Machine Book* will show readers how to turn rubber bands, paper clips, straws, plastic bottles, and index cards into amazing, gravity-defying flyers. Learn how to turn a drinking straw, rubber band, and index card into a Straw Rocket, or convert a paper towel tube into a Grape Bazooka. Empty water bottles can be transformed into Plastic Zippers and Bottle Rockets, and ordinary paper can be cut and folded to make a Fingerrangs—a small boomerang—or a Maple Key Helicopter. Each project contains a material list and detailed step-by-step instructions with photos. Mercer also includes explanations of the science behind each flyer, including concepts such as lift, thrust, and drag, the Bernoulli effect, and more. Readers can use this information to modify and improve their flyers, or explain to their teachers why throwing a paper airplane is a mini science lesson. Bobby Mercer has been sharing the fun of free flight for over two decades as a high school physics teacher. Light Rains Sometimes Fall - Lev Parikian 2022-05

See the British year afresh and experience a new way of connecting with nature - through the prism of Japan's seventy-two ancient micro seasons. Across seventy-two short chapters and twelve months, writer and nature lover Lev Parikian charts the changes that each of these ancient micro seasons (of a just a few days each) bring to his local patch - garden, streets, park and wild cemetery. From the birth of spring (risshun) in early February to 'the greater cold' (daikan) in late January, Lev draws our eye to the exquisite beauty of the outside world, day-to-

day. Instead of Japan's lotus blossom, praying mantis and bear, he watches bramble, woodlouse and urban fox; hawthorn, dragonfly and peregrine. But the seasonal rhythms - and the power of nature to reflect and enhance our mood - remain. By turns reflective, witty and joyous, this is both a nature diary and a revelation of the beauty of the small and subtle changes of the everyday, allowing us to 'look, look again, look better'. It is perfect gift to read in real time across the British year.
