The World Process; Or, The Origin and Evolution of Life, Mind, Thought and Language Out of the One Element of Existence - Mabel P. Malter 1914

Polarity Management - Barry Johnson 1992

University level text. Some complex problems simply do not have "solutions." The key to being an effective leader is being able to recognize and manage such problems. Polarity Management presents a unique model and set of principles that will challenge you to look at situations in new ways. Also included are exercises to strengthen your skills, and case studies to help you begin applying the model to your own unsolvable problems.

Qabalistic Doctrines On Sexual Polarity - Ann Davies 2021-02-19

There is a fundamental impulse within you to seek understanding, wisdom, true knowledge of yourself, nature, and the universe. The Mystery Schools are and always have been the repositories of special knowledge that is the key to the realization of all that you seek. It is our objective to place this key in the hands of those who are ready to receive and act upon it. This special knowledge enables you to know yourself and your creative powers, and to make for yourself the kind of world you want to live in. The problems that you face in life are not really obstacles, but like a closed door to a room that holds special knowledge. B.O.T.A. gives you the key that will unlock the problem doors of your life, and in their opening, your health, prosperity, and the mastery of your life and environment will increase

My Essential Writings - Thomas Troward 2012

Thomas Troward was an English author whose works influenced the New Thought Movement and mystic Christianity. This edition gives a perfect overview of his most important writings: The Edinburgh Lectures On Mental Science The Creative Process In The Individual The Law And The Word The Hidden Power

Projective Geometry - Olive Whicher 2013

Olive Whicher explores the concepts of polarity and movement in modern projective geometry as a discipline of thought that transcends the limited and rigid space and forms of Euclid, and the corresponding material forces conceived in classical mechanics. Rudolf Steiner underlined the importance of projective geometry as, "a method of training the imaginative faculties of thinking, so that they become an instrument of cognition no less conscious and exact than mathematical reasoning." This seminal approach allows for precise scientific understanding of the concept of creative fields of formative (etheric) forces at work in nature-- in plants, animals and in the human being. The author's groundbreaking book presents an accessible approach to projective geometry for non-mathematicians. Profusely illustrated and written with fire and intuitive genius, this work will be of interest to anyone wishing to cultivate the power of inner visualization in a realm of structural beauty.

Innovative Methods of Marine Ecosystem Restoration - Thomas J. Goreau 2012-12-04

Innovative Methods of Marine Ecosystem Restoration offers a ray of hope in an increasingly gloomy scenario. This book is the first presentation of

revolutionary new methods for restoring damaged marine ecosystems. It discusses new techniques for greatly increasing the recruitment, growth, survival, and resistance to stress of marine ecosystems, fis

RADICAL LIGHT - Sylvia Bennett 2010-02-24

This second book of the Real Magic series continues to explore the ancient Hermetic Teachings as "A mental art?the art of using consciousness itself as the tool for creating changes in consciousness.? What does the Hermetic axiom "as above, so below" really mean? The relationship between macrocosm (above) and microcosm (below) is the key to the Hermetic Teachings. Macrocosm refers to the Eternal Reality of Light; the realm of God. Microcosm is its reflection; a fragmentation of Light; the world of human existence and human ego. The core of the Hermetic Teachings for centuries has been focused on transforming the fragmented body of Light in human consciousness and uniting below with above.

Creative Methods in Schema Therapy - Gillian Heath 2020-06-18

Creative Methods in Schema Therapy captures current trends and developments in Schema Therapy in rich clinical detail, with a vividness that inspires and equips the reader to integrate these new ways of working directly into their practice. It begins with creative adaptations to assessment and formulation, including the integration of body methods to promote engagement and to bring about early emotional change. Other chapters introduce innovative methods to lift a formulation off the page and it goes on to bring to life new developments across all aspects of the ST change repertoire, including limited reparenting, imagery, trauma processing, chair work, the therapy relationship, empathic confrontation and endings. For the specialist, there are chapters on working with forensic modes, eating disorders and couples work. Finally, the book includes chapters on the integration of key principles and techniques from Cognitive Behavioural Therapy, Emotion Focused Therapy and Compassionate Mind work into a core schema model. The book will appeal not only to full-fledged schema therapists, but also to junior therapists and therapists from other modalities who are willing to enhance their ways of working.

The Primary Way - Chung-ying Cheng 2020-09-01

A unique work on the underlying ontology, cosmology, and moral philosophy of the Yijing. In The Primary Way, the distinguished scholar of Chinese philosophy Chung-ying Cheng synthesizes his lifetime of work on the Yijing, also known as the I Ching or Book of Changes. Cheng offers a systematic engagement with the classic Chinese text as a philosophy that is still valuable and relevant today. In contemporary philosophical terms, Cheng has developed the ontological hermeneutics of the Yijing as well as its philosophical methodology of symbolic reference in a holistic and onto-generative system of trigrams and hexagrams. The book is organized around eight themes that illuminate Cheng's interpretation of the Yijing as a philosophy for creative human action and transformation. He demonstrates how the philosophy of change in the Yijing embodies early Chinese ontology, cosmology, epistemology, and virtue ethics in the interpretation of divinatory judgments. Cheng's work shows how the philosophy of change contains a vision of humanity as creatively related to heaven and earth, and how it gives positive meaning to any change as part of a ceaseless creativity. With this understanding, it enables humanity to develop its potential as a partner of heaven and earth. Chung-ying Cheng is Professor of Philosophy at the University of Hawai'i.

His many books include *New Dimensions of Confucian and Neo-Confucian Philosophy*, also published by SUNY Press.

Creativity at Work - Roni Reiter-Palmon 2021-01-04

This book brings together leading scholars in the field of creativity to provide an overview and examination of the work of Teresa Amabile, a pioneer of research on organizational creativity. The authors explore Dr. Amabile's contributions to the modern study of creativity in organizations and her influence on current research. Further, they also reflect on how her work might be used to advance future research, particularly in the areas of componential theory and its extension as well as the consensual assessment technique. The contributors include both eminent and emerging scholars and their diverse backgrounds can be seen to reflect the breadth of the impact of Teresa Amabile's work across the areas of the social psychology of creativity, creativity measurement, and application of this knowledge to understanding creativity and innovation in the workplace. This book will provide an invaluable resource to students and scholars of social psychology, creativity studies, industrial and organizational psychology, business and management.

Unleashing the Positive Power of Differences - Jane A. G. Kise

2013-11-05

All too often, key education initiatives collapse because leaders fail to anticipate and learn from the concerns of those charged with implementation. This illuminating book shows how education leaders can bring opposing groups to common ground, resulting in a solid plan built on diverse wisdom. Acclaimed education coach Jane Kise demonstrates how polarity thinking—a powerful tool for bridging differences developed by Barry Johnson of Polarity Partnerships—provides an alternative to endless debates and either/or thinking. Rather than seeing conflicting forces, the tools help us view them as equally important—even interdependent—concepts, approaches, or models. Readers will find: Ways to recognize polarities, map the positive and negative aspects, and channel energy wasted on disagreement toward a greater common purpose Tools for introducing and working with polarities Polarity mapping to help leaders improve processes for leading change and creating buy-in Ways to use polarity with students as a framework for higher-level thinking

Innovations in Army Energy and Power Materials Technologies -

Edward C. Shaffer 2018-09-20

This compendium reports fundamental science and engineering advances of the US Army Research Laboratory (ARL) within the area of Energy and Power technologies. Although, in general, ARL's Materials Research encompasses a broad range of materials technologies (e.g.: Photonics, Electronics, Biological and Bio-inspired Materials, Structural Materials, High Strain and Ballistic Materials, and Manufacturing Science), this publication specifically addresses selected energy and power material related work at ARL. While this work includes electrochemical energy storage (batteries and capacitors) and electrochemical energy conversion (fuel cells, photoelectrochemistry, and photochemistry), special emphasis is given on electrochemical energy storage: • Micro Electro-Mechanical Systems (MEMS): Power density, efficiency, and robustness of motors, generators, and actuators while also reducing their life cycle costs. • Energy Storage: Electrical and electrochemical energy storage devices to decrease device size, weight, and cost as well as increase their capabilities in extreme temperatures and operating conditions. • Power

Control and Distribution: Tactical, deployable power systems using conventional fuels, alternative fuels, and energy harvested from renewable/ambient sources. • Power Generation/Energy Conversion: Smart energy networks for platforms, forward operating bases, and facilities using modeling and simulation tools as well as new, greater capability and efficiency components. • Thermal Transport and Control: Heat and higher power density systems, advanced components, system modeling, and adaptive or hybrid-cycle technologies. Keywords: Electrochemical Energy Storage, Batteries, Capacitors, Electrochemical Energy Conversion, Fuel Cells, Photoelectrochemistry, Photochemistry, High Voltage Electrolytes, Li-ion Batteries, Li-ion Chemistry, Lithium-Sulphur Batteries, Nuclear Metastables, Pyroelectric Energy Conversion, Charged Quantum Dots, High-Efficiency Photovoltaics, IR Sensing, GaN Power Schottky Diodes, Threshold-Voltage Instability, Reliability Testing, SiC MOSFETs, Power Electronics Packaging, High Voltage 4H-SiC GTOs, Silicon Carbide, Avalanche Breakdown Diode, SiC PiN Diodes, Thyristor Protection, Compact DC-DC Battery Chargers

The Power of Polarities - John van der Steur 2017-11-20

First, Know Your Self. What explains extraordinary human achievement? When things are achieved against all odds? Whether you are an individual, team or organization, the key to human achievement lies in opening yourself up to introspection. Who am I? What am I good at? What do I want to do with my life? How can I get there? Next, understand the polarities in the personalities of yourself and others. The secret behind the power of polarities is that paradoxically they are intended to harmonize, not polarize. Their purpose is to balance, not disrupt each other. They then become an infinite inner source of growth and renewal that can be accessed by anyone, anytime, anywhere. Great achievements are grounded in the ability to harness the power of polarities and cover all the bases of the personality. This book uses a novel interpretation of Carl Jung's personality types to help you discover the answers to these questions. It can help you to: Understand your personality and its development Thrive in life's significant roles and relationships. Find the key to your genius Understand and take responsibility for your limitations Live your life with intention and have authentic impact Gain a sense of purpose, meaning and belonging Change and forge your destiny Be the best you can at what you do "The Power of Polarities is a lively and serious contribution to the literature on Jung's psychological types theory and its practical application. The emphasis on polarities is fundamental and salutary." Dr. Murray Stein, PhD, Jungian Analyst, Author, and former President of the International Association for Analytical Psychology.

Materials Chemistry - Klaus Friedrich 2016-04-05

This book focuses on important aspects of materials chemistry by providing an overview of the theoretical aspects of materials chemistry, by describing the characterization and analysis methods for materials, and by explaining physical transport mechanisms in various materials. Not only does this book summarize the classical theories of materials chemistry, but also it exhibits their engineering applications in response to the current key issues. The chapters provide practical equations, figures, and references, providing suitable complement to the text. This book is designed to provide important information for scientists and engineers on experimental research in materials chemistry using modern methods. The methods and instrumentation described represent modern analytical techniques useful to researchers, product development specialists, and quality control experts in polymer synthesis and manufacturing.

THE CREATIVE PROCESS IN THE INDIVIDUAL by THOMAS

TROWARD - THOMAS TROWARD 2021-01-01

THE CREATIVE PROCESS IN THE INDIVIDUAL by THOMAS TROWARD

In recent years there has been a resurgence of interest in the ideas and principles of the creative power of thought and, in particular, in the 'Law of Attraction'—a universal principle that was articulated over 100 years ago in the field of mental science called, 'New Thought.' THE CREATIVE PROCESS IN THE INDIVIDUAL by THOMAS TROWARD The 'Law of Attraction,' or the new buzzword, 'The Secret,' points to the universal principle that 'like attracts like'—and if we hold to the principle that our thoughts are creative, then the wise application of the Law of Attraction would be to think about what you want (the positive) and not about what you don't want (the negative). THE CREATIVE PROCESS IN THE INDIVIDUAL by THOMAS TROWARD That's one way a person can consciously work with this law. However, the mainstay of what we attract corresponds to what we hold to be true, and how we truly feel about ourselves. So changing our thoughts, thinking about the positive (and not the negative), is a surface approach which has some positive effect but it

does not get to the root of the issue—which the concepts we hold about ourselves, our place in the world, and our relationship to Universal Spirit. **THE CREATIVE PROCESS IN THE INDIVIDUAL** by THOMAS TROWARD

The Oxford Handbook of Organizational Paradox - Wendy K. Smith 2017-09-07

The notion of paradox dates back to ancient philosophy, yet only recently have scholars started to explore this idea in organizational phenomena. Two decades ago, a handful of provocative theorists urged researchers to take seriously the study of paradox, and thereby deepen our understanding of plurality, tensions, and contradictions in organizational life. Studies of organizational paradox have grown exponentially over the past two decades, canvassing varied phenomena, methods, and levels of analysis. These studies have explored such tensions as today and tomorrow, global integration and local distinctions, collaboration and competition, self and others, mission and markets. Yet even with both the depth and breadth of interest in organizational paradoxes, key issues around definitions and application remain. This handbook seeks to aid, engage, and fuel the expanding interest in organizational paradox.

Contributions to this volume depict how paradox studies inform, and are informed, by other theoretical perspectives, while creating a resource that enables scholars to learn about and apply this lens across varied organizational phenomena. The increasing complexity, volatility, and ambiguity in our world continually surfaces paradoxical dynamics. Thus, this handbook offers insights to scholars across organizational theory.

The Wisdom of Thomas Troward - Thomas Troward 2013-05-13

Included here are The Edinburgh Lectures on Mental Science, The Dore Lectures on Mental Science, The Law and the Word, and The Creative Process in the Individual. Thomas Troward was an early New Thought writer who had an immense impact on those who would follow. Ernest Holmes, Frederick Bailes, Joseph Murphy, and Emmett Fox cited him as a major influence, and Genevieve Behrend was his student. It is impossible to over estimate his importance to the New Thought movement. His intense fusion of Eastern and Western philosophy is unmatched. The Law and the Word explores the connection between thought energy, scientific reasoning, and creative power. The Creative Process in the Individual scientifically explains the sequence of creative activity starting from the beginnings of life through the development of mankind. The Edinburgh and Dore Lectures on Mental Science are required reading for anyone wishing to understand and control the power of the mind.

The Way of the Beloved - Robert Arsdale 2016-11-18

The foundation of the Way of the Beloved is discovered in the heart of love itself, where there lives and moves a will to exaltation of the other. To truly love another is to will the spiritual ideal upon that beloved one. When there is a mutual intention to exalt infusing the daily life of a man and woman, they enter into the Way of the Beloved. This handbook is an attempt to put into book form what authors Robert and Diana Van Arsdale have been teaching to small groups of couples since 1976. Their workshops offer an ageless set of protocols for the transformation of the love relationship between a woman and a man into a path of spiritual development. Here they present an integrated body of progressive, experiential exercises and meditations that were taught originally taught by Herman Rednick. Simply stated, The Way of the Beloved teaches a couple how to actualize the potential of their relationship through the intensification of love and compassion. Designed for couples in search of spiritual and emotional exploration, this guide offers methods intended to help them realize a vision of love fulfilled.

Trauma to Triumph - Mark Goulston 2021-03-23

When you turn a crisis or even a trauma into a learning moment, it will turn fear into courage and then determination. This leadership roadmap shows you the way to successfully navigating through crisis or trauma and coming out stronger on the other side. Organizational trauma takes many forms. It could be a pandemic that disrupts the way people work. An economic meltdown. An act of violence. A failed merger. A layoff—or continual threats of one. Whatever the scenario, events like these can traumatize leaders and employees, sending everyone into survival mode. Here's the good news: when leaders navigate a traumatic event effectively, the organization doesn't just survive. In *Trauma to Triumph*, Mark Goulston, MD, and Diana Hendel present a visionary and tactical roadmap to help leaders create stability amid chaos and uncertainty, move productively through a traumatic event, and flourish in ways previously unimagined. After reading this book, readers will learn: How the survival mechanism manifests in employees and leaders amid trauma The predictable polarities, dilemmas, tensions and other patterns that

emerge in traumatized organizations...and how to break these cycles Why lack of clarity in roles and poor communication are dangerous in times of crisis (and how to avoid these common pitfalls) How leaders can shift to a mindset that helps create trust, confidence, safety, respect, and inspiration in employees Best practices for leading yourself and others through crisis; grieving losses, embracing healthy coping mechanisms, reframing, and more How to launch a rapid-response process where you "control the controllables" and create a framework for making better decisions during a crisis High-impact tactics to help your organization recover and heal in a way that doesn't just return to baseline, but transcends it Filled with tools and tactics, *Trauma to Triumph* is an organization-wide blueprint for navigating a future where we'll likely experience one trauma or crisis after another. It gives leaders at every level the guidance to create confidence, courage, and enthusiasm in their team.

Navigating Polarities: Using Both/And Thinking to Lead Transformation - Brian Emerson 2019-10-15

How do you do two seemingly opposite things at once? How can you be candid and diplomatic, provide structure and flexibility, keep things stable and lead change, and focus on organizational interests while simultaneously doing what's best for employees? Many approach these polarities with either/or thinking, but leaders, teams, and organizations that navigate them using a both/and mindset significantly outperform those who don't. The trick is knowing how. In their work with thousands of people across the globe, Brian Emerson and Kelly Lewis have seen the tension and stress polarities can create in relationships, teams, and in organizations. In this book, they share the practical tools to transform that tension into a positive driving force by expanding either/or thinking to include a both/and mindset.

The Creative Process in the Individual: The Secret Edition - Open Your Heart to the Real Power and Magic of Living Faith and Let the Heaven Be in You, Go Deep Inside Yourself and Back, Feel the Crazy and Divine Love and Live for Your Dreams - Thomas Troward 2013-03-14

In the present volume I have endeavored to set before the reader the conception of a sequence of creative action commencing with the formation of the globe and culminating in a vista of infinite possibilities attainable by every one who follows up the right line for their unfoldment. I have endeavored to show that, starting with certain incontrovertible scientific facts, all these things logically follow, and that therefore, however far these speculations may carry us beyond our past experience, they nowhere break the thread of an intelligible connection of cause and effect.

Polarity in International Relations - Nina Græger 2022

This book brings together a group of leading scholars on international relations to develop and apply the concept of polarity on past and present international relations and discuss its applicability and usefulness in the future. Despite a comprehensive debate on a global power shift, often discussed in terms of the decline of the United States, the crisis in the liberal international order, and the rise of China, IRs main concept of power, polarity, remains undertheorized and understudied. The great powers and their importance for dynamics and processes in the international system are central to current debates on international order, but these debates too often suffer from a combination of politicized empirical analysis and reliance on old theoretical debates and conceptualizations, typically originating in the Cold War security environment. In order to meet these challenges, this book updates, conceptualizes, applies and critically debates the concepts of unipolarity, bipolarity, multipolarity and non-polarity in order to understand the current world order. Nina Græger is Professor of International Relations and Head of Department at the Department of Political Science, University of Copenhagen, Denmark. Bertel Heurlin is Professor Emeritus at the Department of Political Science, University of Copenhagen, Denmark. Ole Wver is Professor of International Relations at the Department of Political Science, University of Copenhagen, Denmark. Anders Wivel is Professor of International Relations at the Department of Political Science, University of Copenhagen, Denmark.

World Political Systems after Polarity - Nerses Kopalyan 2017-06-14

What will the current global political order look like when American unipolarity ends? Historically, the power configurations of world political systems have been defined by four structures: multipolarity, tripolarity, bipolarity, and unipolarity. These concepts inform both the formulation and the analysis of short-term policies and long-term, grand strategies of powerful actors in the world political order and may be of profound importance to the future peace and stability of the global system. The

concept of nonpolarity, however, has never been addressed as a possible or a potential structural formulation in the nomenclature of global political systems. This book provides a coherent conceptualization of nonpolarity and how diplomacy will operate in a more collective age, and fits into the ongoing discussion about the nature of the political world order as we approach the end of the "American century."

[Encyclopedia of Creativity](#) - Mark A. Runco 2020-04-12

Creativity influences each of our lives and is essential for the advancement of society. The first edition of the successful Encyclopedia of Creativity helped establish the study of creativity as a field of research in itself. The second edition, published in 2011, was named a 2012 Outstanding Academic Title by the American Library Association's Choice publication. Featuring 232 chapters, across 2 volumes, the third edition of this important work provides updated information on the full range of creativity research. There has been an enormous increase in research on the topic throughout the world in many different disciplines. Some areas covered in this edition include the arts and humanities, business, education, mental and physical health, neuroscience, psychology, the creative process and technology. Fundamental subjects are discussed such as the definition of creativity, the development and expression of creativity across the lifespan, the environmental conditions that encourage or discourage creativity, the relationship of creativity to mental health, intelligence and learning styles, and the process of being creative. Creativity is discussed within specific disciplines including acting, architecture, art, dance, film, government, interior design, magic, mathematics, medicine, photography, science, sports, tourism and writing. A wide range of topics are covered. Here is a partial overview by topic: Business and organizational creativity: Advertising, Creative Economies, Creativity Consulting and Coaching, Corporate Creativity, Creativity Exercises, Entrepreneurship, Group Dynamics, Innovation, Leadership, Management of Creative People, Patents, Teams, and Training. The Cognitive Aspects of Creativity: Altered and Transitional States, Analogies, Attention, Breadth of Attention, Cognitive Style, Divergent Thinking, Flow and Optimal Experience, Knowledge, Logic and Reasoning, Metacognition, Mental Models, Memory, Metaphors, Mind Wandering, Mindfulness, Problem-Finding, Problem-Solving, and Remote Associates. The Creative Process: Attribution, Constraints, Discovery, Insight, Inspiration, Intentionality, Motivation, Risk-Taking, and Tolerance for Ambiguity. Education: Children's Creativity, , Education, Intelligence, Knowledge, Metacognition, Play, Prodigies, Programs And Courses, Talent And Teaching Creativity. Neuroscience Research: Cellular Matter, Grey Matter, Cellular Density; EEG, Functional Magnetic Resonance Imaging (Fmri), Music and The Brain, Pupillometry, Systems, The Cerebellum and Transcranial Electrical Stimulation. Psychology: The Big 5 Personality Characteristics, Bipolar Mood Disorders, Childhood Trauma, Depression, Deviance, Dreams, Emotions, Expressive Arts, Grit, Introversion, Jungian Theory, Mad Genius Controversy, Openness, Schizotypy, Suicide, Therapy and Counseling Trauma and Transcendence and Transforming Illness and Visual Art. Social Aspects of Creativity: Awards, Birth Order, Criticism, Consensual Assessment, Diversity, Eminence, Families, Friendships and Social Networks, Geeks, Mentors, Millennials, Networking, Rewards, And Sociology. [Managing Polarities in Congregations](#) - Roy M. Oswald 2009-12-31
Congregations often find themselves in power struggles over two opposing views. People on both sides believe strongly that they are right. They also assume that if they are right, their opposition must be wrong--classic 'either/or' thinking. A polarity is a pair of truths that need each other over time. When an argument is about two poles of a polarity, both sides are right and need each other to experience the whole truth. This phenomenon has been recognized and written about for centuries in philosophy and religion. It is at the heart of Taoism, where we find the familiar polarity of yin and yang energy. In the past fifty years, business leaders have come to appreciate the phenomenon, often called dilemma or paradox. No matter what it is called, the research is clear: leaders and organizations that manage polarities well outperform those who don't.

[Dragons — Guardians of Creative Powers](#) - Jaap van Etten 2019-04-22
Do you feel that you often do not get what you desire? The key to changing what no longer satisfies you is to change what no longer works for you. Every thought is an intention that sets a process of energies into motion. That's when the creative process starts. Understanding that we create continuously on small and large levels is the first step in realizing that when something no longer works for us, it is the consequence of a disruption in the creative process and the way we think. This book describes the different types of creative processes. The elemental (fire, water, air, and earth) powers are the basis of all creation. Understanding the different aspects of these creative powers will help you to become a conscious creator. Guardians are connected with every aspect of the elemental powers. They are known as dragons; however, different traditions use different names for them, such as angels or nature spirits. These dragons are not the scary type often depicted in stories. They are among the strongest allies we can ask for. They belong to the subtle realms and therefore are invisible to most people. This book offers information to help you reconnect with these creative powers and their guardian dragons. Through this connection, you will become a conscious creator and change your life in ways that lead to success, joy, happiness, and abundance. Thereby, you will contribute optimally to the creation of a new world. Are you ready for this exhilarating journey?

[The Impact of Bodily Experience on Paul's Resurrection Theology](#) - Kai-Hsuan Chang 2021-09-23

Kai-Hsuan Chang engages with the longstanding scholarly debate concerning the development of Paul's resurrection theology, by investigating the correlation between his bodily experiences and his diverse articulations about resurrection. Drawing on insights from cognitive linguistics, Chang considers Paul's ideas about resurrection as fundamentally grounded in recurrent patterns of bodily experience, arguing that such experience of some religious activities in Paul's time--death rites, spirit possession, and baptism--contributed to the formation and development of his resurrection theology. Chang demonstrates that developments in Paul's ideas about "bodily transformation at resurrection" - reflected in 1 Corinthians 15 - resulted from a change in the experiential patterns on which his new idea is constructed, rather than "transformation during heavenly ascent" as seen in Jewish traditions of resurrection. He thus applies cognitive linguistic tools to two considerations; first, whether Paul had contextual reasons to generate his innovation in 1 Corinthians 15, and second, whether Paul's innovation recurred or had continual effects in Christian groups. In so doing, Chang shows that Paul's innovation directly addressed a contextual issue of death rites in Corinth and exerted a continuing effect on Paul's later ideas of transformation, spirit possession, and baptism.

[Military Innovation in Türkiye](#) - Barış Ateş 2023-01-31

This book explores Turkish military innovation since the Cold War. The major questions addressed are how Türkiye has been able to innovate, the production of new weapon systems, its philosophical background, how the country overcame bureaucratic and economic obstacles, and how these innovations resonated in military doctrine and organization. Focusing on two main defense industry projects that trigger an overall change in the military doctrine and organization, the text examines the innovative inclinations of the Turkish military realm and reveals the societal, economic and political consequences of military innovation. This book fills a gap in the literature by providing an interdisciplinary and comprehensive overview of Turkish military innovation. Contributors include those involved in and affected by the military innovation process, as well as scholars who monitor the process using primary sources. Military Innovation in Türkiye will appeal to academics, politicians and military professionals interested in understanding the evolution of the Turkish military.

Homo Creativus - Todd Lubart 2022-06-07

This book focuses on creativity and showcases a specific approach to creativity. It uses a new 7 C's basis for understanding creativity (creators, creating, cooperation, context, creations, consumption, and curricula). This new approach to creativity is an extension of the 4 'P' approach (person, process, press, and product) which has dominated the literature since the 1960s. In each section, there are two chapters, which illustrate work on the topic and focus on some key issues.

The Power in You - Thomas Troward 2015-06-09

The collected works of the most impactful New Thought figure of the twentieth-century - a must read for every student of metaphysics. This landmark volume collects all six of Thomas Troward's books on the creative powers of the mind - and, as a special bonus, includes "Troward's Teachings in Condensed Form" by Harry Gaze, which digests the visionary's ideas into 58 aphorisms. Troward's ideas about the power of directed thought prefigured some of today's key advances in

neuroplasticity, placebo studies, and cognitive psychology. His writings were a major influence on figures ranging from Ernest Holmes to early members of Alcoholics Anonymous to makers of *The Secret*. The works of Thomas Troward have been previously dispersed among piecemeal volumes - *The Power in You* is the first authoritative anthology of his writings. This volume includes: *The Edinburgh Lectures on Mental Science* (1904, revised 1909) *The Doré Lectures on Mental Science* (1909) *The Creative Process in the Individual* (1910, expanded 1915) *Bible Mystery and Bible Meaning* (1913) *The Law and the Word* (1917) *The Hidden Power* (1921) *Troward's Teachings in Condensed Form* by Harry Gaze (1958)

No-Till Intensive Vegetable Culture - Bryan O'Hara 2020-02-21

From a veteran organic grower: a unique agricultural methodology that delivers higher yields, higher quality, and higher profitability—absolutely free of herbicides or pesticides No-till farming has rapidly grown in popularity among vegetable growers due to its high-quality, high-yield, high-profit results. Renowned organic grower Bryan O'Hara perfected the technique during the multi-year transition of his Connecticut vegetable farm to a no-till system. His vibrantly healthy, resilient plants are testaments to the value of allowing the inherent biological functions in soil to do their work. In *No-Till Intensive Vegetable Culture*, O'Hara describes the methods he has developed, which are completely free of herbicides or other pesticides and require only a few acres of land and minimal capital investment. He asserts that this flexible, ecological methodology is as important for soil fertility as it is for his economic success. This comprehensive manual delves into all facets of a dynamic, holistic growing system, including: No-till bed preparation techniques Seeding and transplanting methods Irrigation Use of fertilizers (including foliar feeds) Composting (preparation and application) Culture of indigenous microorganisms to support soil biology Pest and disease management Year-round growing Harvest and storage techniques O'Hara also explores the spiritual dimension of managing a farm ecosystem: observing the natural balance between plants, soil, air, water, and sunlight and the ways in which working to maintain that balance influences practical production decisions. Whether you're a high-yield producer, a homesteader, or a market gardener, *No-Till Intensive Vegetable Culture* is the go-to vegetable grower's manual for the twenty-first century. O'Hara's advanced yet accessible methodology will both help you respond to natural systems and adapt to meet future challenges.
