Using the same common-sense approach he used in his bestselling book **BLACK+DECKER Codes for Homeowners**, Barker isolates the aspects of deck building that are the most frequent sources of trouble and shows--with photos, illustrations, and commentary--exactly how to do it correctly. Barker's new book is not only for DIYers who are building a brand new deck. National deck building codes have changed significantly in the past five years: 4 x 4 posts are no longer allowed for structural purposes that a few years ago were deemed fine, and minimum diameter requirements for concrete posts have doubled in many applications. If your existing deck is more than two or three years old, you'll want this detailed but accessible volume. National Electrical Code - National Fire Protection Association 2007
