*Strengthening Forensic Science in the United States* - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to

establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Go Blended!** - Liz Arney 2015-02-02

Craft a blended learning program tailor-made for your students Go Blended! is a practical implementation guide for educators interested in getting blended learning off the ground. Author Liz Arney is a seasoned developer of blended learning programs at Aspire Public Schools, and she also closely collaborates with district and charter leaders from across the country on this work. Go Blended! offers boots-on-the-ground support for laying the foundation for a blended learning program in our schools and classrooms. Throughout the book teachers with blended learning experience share helpful tips and lesson plans to help educators make purposeful choices in using technology to fulfill students' needs without becoming an end in itself. This useful guide also offers key documents and timelines to support a blended learning implementation and provides step-by-step practical advice for avoiding mistakes. Readers

will gain expert insight into both the broad and narrow of blended transition, from sweeping concepts like program goals to nitty-gritty details like teaching routines around technology use. Technology is rapidly changing the landscape of education; teacher effectiveness and student achievement are both tied to the ability to adapt to new technology, and blended learning has become a hot topic in schools across the nation. *Go Blended!* helps school leaders and teachers take their first steps toward blended learning, putting them in a better position to continuously adapt as the world changes. You'll learn how to: Investigate leadership and staff readiness to "go blended." Learn how to evaluate and purchase the right educational software. Keep the program's goals in mind throughout the development process. Teach lessons that set students up for success when using classroom technology. Tailor the program to the students, not the other way around. Aspire's impressive track record of high performance, along with a growing body of evidence from blended schools across the nation, testifies to the reality that incorporating technology into the classroom can improve student outcomes. But improved student outcomes will only occur when teachers and administrators intentionally tailor technology and curricula to meet their goals. With *Go Blended!*, you can be confident that you're focused on the ultimate goal of blended learning: increasing student achievement.

**Preserving the People's Post Office** - Christopher W. Shaw 2006  
Christopher Shaw, the book's author said, "Through preferential postage rates for nonprofits the Postal Service facilitates civic involvement and a healthy democracy." Nader also noted, "Postal employees are fairly remunerated in an increasingly low-wage, low benefit 'Wal-Mart' economy." According to Nader, "Post offices serve as the heart of community life in neighborhoods and towns nationwide and the presence of postal workers on community streets make them safer, as the many beneficiaries of their frequently heroic efforts attest." "The lack of citizen-consumers' involvement in the recently passed postal reform legislation has highlighted the need for a public dialogue about the future of our postal system. The book provides a starting point for that conversation," stated Nader.

**Core Entrustable Professional Activities for Entering Residency -**

Association of American Medical Colleges 2014-05-28

This landmark publication published by the AAMC identifies a list of integrated activities to be expected of all M.D. graduates making the transition from medical school to residency. This guide delineates 13 Entrustable Professional Activities (EPAs) that all entering residents should be expected to perform on day 1 of residency without direct supervision regardless of specialty choice. The Core EPAs for Entering Residency are designed to be a subset of all of the graduation requirements of a medical school. Individual schools may have additional mission-specific graduation requirements, and specialties may have specific EPAs that would be required after the student has made the specialty decision but before residency matriculation. The Core EPAs may also be foundational to an EPA for any practicing physician or for specialty-specific EPAs. Update: In August 2014, the AAMC selected ten institutions to join a five-year pilot to test the implementation of the Core Entrustable Professional Activities (EPAs) for Entering Residency. More than 70 institutions, representing over half of the medical schools accredited by the U.S. Liaison Committee on Medical Education (LCME), applied to join the pilot, demonstrating the significant energy and enthusiasm towards closing the gap between expectations and performance for residents on day one. The cohort reflects the breadth and diversity of the applicant pool, and the institutions selected are intended to complement each other through the unique qualities and skills that each team and institution brings to the pilot. Faculty and Learners' Guide (69 pages) - Developing faculty: The EPA descriptions, the expected behaviors, and the vignettes are expected to serve as the foundation for faculty development. Faculty can use this guide as a reference for both feedback and assessment in pre-clinical and clinical settings.- Developing learners: Learners can also use this document to understand the core of what is expected of them by the time they

graduate. The EPA descriptions themselves delineate the expectations, while the developmental progression laid out from pre-entrustable to entrustable behaviors can serve as the roadmap for achieving them.
